Feels like a feather in June or January

Pre-Laxed in the loom by Pacific and "Balanced Tailoring" by Timely Clothes-the secret of

Plateau's famous "weightless feel" The trend today is to the all-season "weightless feel" of Plateau® suits, You

get a lot more wear out of a suit like Plateau and a lot more comfort while Plateau suits are made of 100% fine

wool, pure, soft, luxurious wool, Pre-Laxed by Pacific Mills in the loom-and

they have "Balanced Tailoring" by the masters themselves, Timely Clothes.

The cloth is smooth and lustrous. A joy for Timely to tailor and a breeze for you to wear. The crease of the trousers stays in longer than ordinary wool—and naturally, there's an excellent choice of models and colors.

Your Timely clothier is the only place you can find the Plateau label. Visit him and slip on a Plateau jacket "just for size." We guarantee you'll become fondly and firmly attached to the whole suit in a matter of minutes! Priced at \$72.50.

RESEARCH REEPS B.F.Goodrich FIRST IN RUBBER

Hose used to be more dangerous than snakes

A typical example of B. F. Goodrich improvement in rubber

Those men are inches away from a high explosive. Heating thick, gooey asphalt to get it out of a tank car takes super-heated steam under terrific pressure, carried into the car through hose.

Heat used to weaken steam hose. Sometimes it burst at the weakest spot, with explosive force, spraying scalding steam in all directions. It was dangerous to workmen and a constant expense.

B. F. Goodrich men believed a hose could be made completely burstproof. They designed one with layers of fine

braided steel wire, then layers of a new kind of heat-resisting rubber, inside, outside and between the braids. Not one length of this hose has ever been known to bust. Even if a hose wears out after years of service, steam can leak out but it cannot explode. Workmen are as safe as they are at home.

The B. F. Goodrich hose in the picture had been in use for 2½ years when the picture was taken—far longer than any steam hose used before by this construction company—and showed no sign of wearing out. It not only

stands heat better but wears better. Its rubber cover resists abrasion better than steel. This B. F. Goodrich hose is 30 per cent lighter than steam hose used to be, more flexible, easier to handle.

Call your B. F. Goodrich distributor for more information about steam hose or other hose, belting or other B. F. Goodrich rubber products. The B. F. Goodrich Co., Department M-493, Akron 18, Ohio.

The mountain that swallowed itself

Many centuries ago, the 7000-foot cone of a mighty volcano collapsed, and some 17 cubic miles of fiery mountain were swallowed into the depths. In the resulting crater was formed one of the eight natural wonders of the world, Oregon's Crate Lake. It is one of the deepest lakes on the North American Continent and the bluest lake in the world. As a national park it belongs to you.

Today, where lava once bubbled, you can drive around the spectacular crater rim or take a boat trip beneath towering 2000-foot cliffs. These waters offer what many consider the finest fishing in the entire park system with trout 36 inches long on the record. With an average annual snowfall of 50 feet, the year also offer excellent skiper.

fall of 50 feet, the park also offers excellent skiing.
Crater Lake, like each of the national parks, has the special essence of America. Lake America it was born of fire and upheaval . . . but when the violence was through, something new and beautiful was created that hadn't been there before. And a man can look at it and find it good . . .

Sinclair Salutes The Izaak Walton League of America . . .

for its many important contributions in the field of conservation. With headquarters at 31 North State Street, Chicago, the League is a non-profit corporation formed to conserve, maintain and restore America's soil, woods, waters and wildlife.

Two of the most important League activities are the Young Outdoor Americans program, through which the League works to develop, in youth, a greater appreciation of nature; and the Land Endowment Fund, under which the League acquires and turns over to the Federal Government, privately-owned lands within National Parks and Forests. Largely through the League's unflagging efforts the Superior National Forest in Minnesota has been preserved as a great wildeness area.

We still take the time in Lynchburg, Tenn. (pop. 399) to "charcoal-mellow" whiskey...drop by drop...for the world's rarest, smoothest flavor

drop in and see for yourself the special way we make Jack Daniel's whiskey here at the oldest registered distillery in the country.

You'd see something in this leisurely little town of Lynchburg you couldn't see anywhere else in the world. It's an old Tennessee process we call chareat-melloning. And we still use it for one very good reason: it produces the smoothest, most distinctive whiskey flavor you ever put to your lips.

Now, charcoal has been a good friend to the whiskey maker for a long, long time. All distillers age their whiskey in charred oak barrels. We do that, too. But belgar we age, we choose to give our whiskey an extra blessing of flavor-smoothing charcoal that no other whiskey gets.

Charcoal-mellowing begins with hard maple logs. The logs are cut, stacked in ricks and burned to char. This charcoal is ground fine and packed tightly to a 10-foot depth in special wooden vats.

Before we let any Jack Daniel's go to the aging barrels, it must first trickle slowly—inch by inch, drop by drop—down through one of these

To make a flavor smoother, ricks of maple burn.

Cradled in the Cumberland foothills, the oldest registered distillery in the U.S.

room-high vats of hard maple charcoal. What comes out ten long days after it goes in, is only the richest, smoothest part of the whiskey. What's left behind are the "rough edges" that nobody wants in a whiskey's flavor.

Like many folks who see how we charcoal-mellow Jack Daniel's and then sample its sippin' smooth flavor, you'll probably wonder why in the world no other whiskey is made this way.

We can't answer for others, of course. But as far as we're concerned, we will never make Jack Daniel's any other way—no matter how much it costs or how long it takes.

So...if you get half a chance, drop in and say hello. It's Fall—and that's a grand time for a trip through Tennessee. We're between Nashville and Chattanooga, just off Highway 41A. We're keeping the latch string out for you.

Meanwhile, don't wait until you can get down here to try our whiskey. Next time you buy, make it Jack

Daniel's. And if you have trouble finding it, we hope you'll fuss a little. To us and to your dealer.

GREEN label for those who seek a truly rare flavor. BLACK label -- even rarer.

JACK DANIEL DISTILLERY, LYNCHBURG, TENNESSEE

Where's the smart place to put your savings?

Today millions of Americans will tell you that the smart place to save your money is an insured Savings and Loan Association. They'll give you three good reasons why this is so...

- You're smart to put your money where it brings you excellent returns. Insured Savings and Loan Associations can invest most of their funds in sound, steady-paying home mortgages. They really make your money work hard for you.
- 2. You're smart to put your money where you know it's safe. In these Associations, it's protected by good management and substantial reserves. And the Federal Savings and Loan Insurance Corporation—an agency of the U. S. Government—insures your savings up to \$10,000.
- A. You're smart to deal with *friendly, experienced people*. People who really know their communities. People who are right on the spot when you need them.
- So it's hardly surprising that Americans are now putting more of their hard-earned savings account dollars into insured Savings and Loan Associations than they put anywhere else.

And here's another important point: When you're thinking of buying a home, remember that these Associations are the nation's largest single source of home mortgage loans! They make liberal loans. They see to it that you get the money quickly—and at moderate rates.

Shouldn't you get to know an insured Savings and Loan Association in your community? You'll find it's a mighty good place to do business! © 1001, 1784.75

SAVINGS AND LOAN

FOUNDATION

The Savings and Loan Foundation, Inc., is an organization of insured Savings and Loan Associations from coast to coast—dedicated to the preservation of democracy through thrift and home ownership in every American community. Address: IIII E Street N. W., Washington, D. G.

blem. It identifies associations insured by the FSLIC.

Small Doses of Torture

I consider the current crusade against

. . . I consider the current crusade against the Air Force's survival school [Sept. 19] as ill-advised, misinformed and dangerous. Last January I went through the course at Stead with the RB-36 crew that I was on at the time. It was no picnic, but I saw no brutality or needless suffering on anyone's part. The instruction, demonstration problems were pertinent and well presented. and had the invaluable effect of giving the trainees . . . a good inkling of and preparation for what to expect. . . . The Stead school was the best training

that I had while in the Air Force, and I'm sure all the other men who have been through it regard it with as much respect as I do

MALCOLM G. STEVENSON, A.F.R. Upper Montclair, N.J.

Your summing up of the torture program at Stead Air Force Base . . . expressed the thoughts of thousands of Air Force mothers like myself who would be accused of sentimentality for saying it . . .

MRS. EDMUND MAHON Grosvenor Dale, Conn.

. . . You can't explain to anyone, or show him either, how he will react emotionally to Communist prisoner-handling methods . . so how can you expect a man to harden himself to unusual conditions by watching instructors whip off a routine demonstration

instructors whip off a routine demonstration in which the student can take no part?

In analyzing the training at Stead Air Force Base, many of the "tortures" listed are not tortures in the popular sense of the word; they are physical discomforts. Millions, that's right, millions of men have undergone the same sensations in the ordinary course of duty. The comparisons may not be exact, but I can personally guarantee a decided similarity. For example, many an

THE FORWARD LOOK '56... PUSHBUTTON POWERFLITE

Just finger-tip the button and you're ready to go!

Just think! You can now select your driving range with a touch of your finger to a button on the dash at your left — where only you can touch it.

Press "D" and you're in Drive. Step on the gas and away you go, with PowerFilite, best combination of smoothness and acceleration among all automatic drives. To Reverse, simply push "R"; for Low, push "L"; for Neutral, press "N". The dash location for the drive selector in our 1955 cars was so popular that we've now taken the next logical step... far ahead of other cars.

And PUSHBUTTON POWERFLITE is just one of the many surprising new features developed as a result of your

many surprising new features developed as a result of your favorable response to our 1955 cars.

In fact, people found the differences between our 1955 cars and others to be so great and so good, that within a few short months after their introduction, more than a million

families selected a new Plymouth, Dodge, De Soto, Chrysler or the exclusive Imperial. For '56, the second challenging year of THE FORWARD LOOK, the differences are greater still!

You'll see this in THE FLIGHT-SWEEP . . . freshest new note in car design in many years, keynoted by a single stroke of modern line from jutting headlight to the bold, crisply upswept rear fenders.

You'll discover new performance in these cars, too . . . new power and new economy from the most advanced engine design in any cars today.

You'll enjoy a new kind of ride, that hardly cares what kind of road you travel on. And with it you can have full-time Safety-Touch Power Steering that gives your hand the same consistent control and ease in every mile, every day.

You'll find new safety in these great new cars. New Life-Guard door latches that hold fast under stress as no latches have ever done before. New hydraulic braking systems that have never had their equal for ease of operation and for sureness of control.

And you may even have new Safety Seat Belts, if you wish, front seat and rear.

Yes, here will be cars that literally borrow from tomorrow to put you ahead today. Cars that move THE FORWARD LOOK even farther forward. Cars in every price class, from lowest to most luxurious, that bring you things that other cars at any price don't have.

Make a date to see them at your dealer's.

infantryman has slept in a water-filled forbole for "hours of darkness"; frozen, greasy hamburger or spacketti in the same condition has been eaten (abelt, without much reliab) by the same infantrymen; and if an early the same infantrymen; and if an early the same infantrymen; and if the same with the same infantrymen; and if him try it; while we are about it, let's not forcet the unpleasantness of a 12-in, gun

turret fring support missions for the Marines.

As to that which can ruly be classed as torture, the effect of such methods can be materially negated by actual training somewhat resembling the original combined with good physical conditioning. As to the mental strain, any mature individual (or one had to be considered to the control of the control o

heeded on a closed and disciplined mind. The Air Force should be commended, not condemned, for realizing that their duties by their very nature do not normally subject airmen to extreme physical discomfort. This is their answer to the problem. If it is not the best, let the detractors devise and recommend a better one. We are face to face with the reality that normal training methods have proved inadequate.

P. D. REISSNER JR. Captain, U.S.M.C.

Santa Ana, Calif.

Sir:
Your article simply appalls me. The staggering question it brings to my mind: Is the Western World Christian or not?

While you most aptly grasp the shortcomings of administering torture to create immunity, there is also the frightening thought: What is it doing to the men instructed to administer it? It will surely shape characters more dangerous by far than lack of character could be. One begins to wonder how many cruel Nazis were blanneless, but were trained into their jobs in this manner...

Bloemendaal, Holland Sir:

. . Have any colonels or majors given

thought to a school where servicemen would be shot so they would know how to act when wounded or dead? C. R. TREYENS

Norwood, Ohio

On every count is the procedure at Stead indictionable: I) these men may never be in the situation for which they are (presument of the situation for which they are (presument of the situation for which they are presument of the situation or cannot endire now is no index to their reaction one, three, ten years from now, should they at some time become p.O.W.a. Physical tween sow and that time may change the whole course of their behavior, especially under stress. 3) who knows what new and whole course of their behavior, especially under stress. 3) who knows what new and detected at some future time, for which these detected at some future time, for which these

victims have had no "rehearsal"?

Buying a watch is a serious business. You'll expect to wear it and consult it for many years. Buy the best watch you can afford—and you can afford—a Longines. 5 Yince a Longines: is just about the finest watch in all the world, it does cost more. But if a Longines costs even trice as much as another make, it would still be your best buy in the long run. Do you know that given reasonable care, the Longines watch you buy today will run better annew 10 or even 20 years from now? That is one tangible result of Longines workmanship. I In fact, the pleasure and satisfaction which comes from owning a Longines is priceless. 5 Among the lundreds of different Longines watches, there is one made just for you. Your Longines-Wittnauer Jeweler will be honored to help you choose your Longines, the world's most honored watch. Paulos Lington Longines, the world's most honored watch.

Here Is Weight-Saving, Money-

Is Standard Equipment on 1956 Trucks . . . And

A NEW DAY is dawning for truck owners because America's leading truck manufacturers have adopted Firestone Tubeless Truck Tires and Firestone One-Piece Drop-Center Rims as standard equipment for over-the-highway trucks.

When tubeless truck fires were first offered to truck manufacturers, several multiplice to truck manufacturers, several multiplice maximum were suggested which did not provide maximum weights-saving and money-avaing advantages. Firestone, world's largest manufacturer of truck times, would for accept old conventional contentions and invested millions of dollars to develop a practical, one-piece desponenter rim that would provide the utmost weight-saving and money-saving advantages.

Truck manufacturers subjected these various

rims to severe and exhaustive tests. The new Firestone Tubeless Tire and One-Piece Rim combination proved to be so outstanding that it was adopted by the Tire and Rim Association as standard for the industry.

The precision-engineered Firestone Tubeless Truck Tire and One-Piece Rim combination provides greater safety and gives longer mileage than the conventional fire and tube assembly, it is simple to mount and demount, has a positive air seal with no parts to wear out, break or cause air loss, and there is no danger of side rings blowing off. The cured-in Safety-Liner clings to puncturing objects, preventing loss of air. This greatly reduces road service calls and losses from damaged tires. And above all, it gives from damaged tires. And above all, it gives

THE FIRESTONE TUBELESS

Offers These Weight-Saving, Money-Saving

1. WEIGHT-SAVING

The Firestone Tubeless Tire and one-piece rim combination gives truckers more payload capacity on evers ware tire. As an example, it saves up to 162 pounds per axie using 11-22.5 tires on disc wheels, 125 tires on cast wheels. 11-22.5 in the tubeless replacement size for the conventional 10-00/20.

2. MONEY-SAVING

Blowout and puncture protection... The Firestone Tubeless Transport with its Safetyan Transport with its Safetyan eliminates the dangers of punctures and blowouts which result from pinched or chafed tubes. The Safetyliner clings to puncturing objects, preventing air loss. Greatly reduces road service calls, downtines and loss fee calls. downtines and loss

3. SIMPLICITY

The Firetone Tubeless Truck Truck and rim it a simple two-price assembly consisting of a tire and one-piece run compared with the conventional assembly of See or sty pieces. The new Firetone Tubeless Truck Tire assembly gives a posture are seal with no run parts to spring, break or deteriorate with age, causing serior failures. It is simple to mount and demount and provides maximum demount and provides maximum

4. SAFETY-TENSIONED GUM-DIPPED CORD BODY

Exclusive Firestone Safety-Tensioned Gum-Dipping takes the stretch out of truck tire cords. This results in elimination of tire growth and tread cracking, greater resistance to impact breaks, longer life and more money-saving

SMITH IN MONTANA

Dear TIME-Reader:

THE boys will be at Three Forks in a couple of days. I'd better get out to meet them.

Whenever Bradley Smith checked the pins on his map and made this sort of announcement, his family knew it was time for him to shoulder his camera and set off on another expedition into the Northwest.

For "the boys" were Explorers Meriwether Lewis and William Clark. And to retrace their journey, photographing each landmark just as they first saw it, at the same time of year and the same time of day, from the same vantage point of mountain peak or river bed that they had described in their journals.

The result, as you will see from the special color section in this week's issue, is the most precise and probably the most complete pictorial color record of the Lewis and Clark trail ever

Photographer Smith, who has long been fascinated by their story, signed his telegrams to TIME "Meriwether

PUBLISHER'S LETTER

Smith." And just as they did. he encountered hardships, for the territory is still largely unaccessible only by foot, horseback or canoe.

From the outset. Smith's own trek was marked by mishap. At Minneapolis, his plane made a forced landing. At Mandan, N. Dak., the wind at the top of a cliff caught the bellows of his camera and tum-

bled him 4 ft. over the edge to a shelf with a view 700 ft. straight down. His great 8 by 10 studio camera-basically unchanged in construction from the days of Daguerre. Morse and Mathew Brady, but still, in Smith's opinion, the best for scenic photography-was smashed beyond repair. A second of these cameras, tripod and all, went to its doom from the top of Rainbow Falls. But the third more than proved where the 40° below temperature

Smith is used to living with excitement. A native of New Orleans, he broke into photo-journalism in 1936 with a dynamite-loaded story, "The Unions Enter the Cotton Fields." To-

day he lives on a farm in Connecticut. He also lives with legend. Says Smith: "We are still close to the pioneers in this country, and have distinct memories of origins. I think of historical figures as alive-and see places as if I were looking over the shoulders of the men who explored them."

I think that's the impression you will get from Bradley Smith's photographs, too.

Cordially yours.

James a. Linen

In England, long noted for its superb

men's woolens, Hunt & Winterborham has a deserved and respected reputation for producing the finest of fabrics. The looming of luxury flannel began at Cam, in the West of England, as far back as 12.2 Many of the present crafts.

at Cam, in the West of England, as far back as 1532. Many of the present craftsmen are descendants of the original Flemish workers whose weaving was more art than craft. This 400-year-old tradition is discernible today in every yard of fabric produced by Hunr & Winterborham.

An outstanding example is the Han-

nel now available in Harr Schaffier & Marx suits...ar a price that is surprisingly reasonable for so luxurious a material. Its even surface is fleecessoft, its finish is mellow, its weight is light and comfortable. And vou'll be gratified to know that it wears well and rerains its shape.

For generations, the only sources for Hunt & Winterborham (flannels were custom tailoring establishments. But now, through the combined efforts of the producers of "England's Most Famous Woollens" and "America's First Name in Men's Clothing," these superlative flannels are also available in ready-towear suits by Harr Schaffner & Marx.

The artistry of their design and tailoring is wholly in keeping with the impressive quality of the cloth. Every detail is lavish: special body and sleeve linings which contribute to the effortless drape of the fabric; quality trimmings; and the finest imported horn buttons.

The skill which is incorporated in both the material and the tailoring could never come from text books. It represents the best of England and America, and could only emanate from long experience, a deep respect for tradition.

May we recommend an early visit to one of the fine stores featuring Hart Schaffner & Marx clothes? See, for yourself, what is truly a "prestige suit."

HART SCHAFFNER & MARX

NATIONAL AFFAIRS

THE NATION Personal & Impersonal

From the President's bedside came homely details-so homely and so detailed as to be in bad taste in many another country, or in this country at any former time. The U.S. was told what his wife read to him, what music he heard and how it was with his eliminative processes. A British reporter was horrified at the intimacy. After listening to Dr. Paul Dudley White's candid exegesis of a medical bulletin, the Briton exclaimed: "Imagine the BBC reporting that about the Oueen!" Presidential Press Secretary James Hagerty overheard him, replied: "Every American family has had a heart attack in it. People are deeply interested in the President's recovery. This is very important.

The feeling of identification between the people and the President was part of a long trend. Statesmanship aside. people and President have been growing closer for a generation-unbuttoned Harding more than Wilson; buttoned, homespun Coolidge more than Harding; Hoover, the self-made great engineer in a day when almost every man dreamed he was an engineer, more than Coolidge: Roosevelt. at his fireside, more than Hoover; plain Harry Truman more than Roosevelt; and Eisenhower, America's idealistic, practical, slightly nasal voice, more than Truman. Was this trend, as John Adams would have suspected, the inevitable result of the leveling factor in democracy? Or had it a subtler and more contem-

It scarcely twiched. The stock market ducked for a day, then bobbed up, the Elsewhere, the momentum of U.S. life activities of the carried on without a jar. The Ford Motor Co. created no surprise whatever by announcing a half-hillion-dollar expansion program in 1056. Aside from their interest in the bulletins from Denver, the the U.S. people concentrated on the World Series, the annual climax of the most highly organized and statisticsadorned game that men have ever played. Somewhere in this polarization between

Somewhere in this polarization between the homely intimacy of the news from the President's bedside and the vast, impersonal complexity of U.S. life lay the key to a worthwide mystery, the mid-century to a worthwide mystery, the mid-century should expressed the words; should expressed the words; should expressed the words; which is a political position independent of Eisenhower's. Yet neither the fact of his illness nor the prospect of his retirement joiled the Administration. The web of committees and the pressure of agenda hold it less that the soul control of the pressure of agenda hold in Eisenhower, quite adequately performs the coordinating functions at the top.

But neither in the Government nor in the nation has automation replaced people. Despite the elaboration of government, business and play in the U.S. the machines still need men and these will probably be marked by two seemingly contrary characteristics, close touch with the people, and uncommon ability to work amid the whirring social machinery of the most complex of nations.

VICE PRESIDENT NIXON
The web absorbed the shock.

THE VICE-PRESIDENCY

(See Cover)

When I speak of substituting good government for poor government, I do not mean electing one individual, one symbol, one person to typity the might and majesty of America—by no means. I mean to elect a team, to send to Washington the pick of our men and women chosen according to merit.

-Candidate Dwight D. Eisenhower at Newark, Oct. 17, 1952

In the green-carpeted Cabinet Room of the White House. 21 men sat down one morning last week to consider the most vital aspects of U.S. defense. First to speak at the regular meeting of the National Security Council was the youngest man at the table. Placing his tan leather briefcase beside his chair. Vice President Richard Nixon leaned forward and opened the meeting in a grave, clear voice: "Gentlemen, as we all know, it is the custom of the Cabinet to open with a silent prayer. While this has not been the practice of the Security Council, may I propose a moment of silent prayer of thanksgiving for the marvelous record of recovery the

President has made up to this-hour: While President Eisenhower lay ill in Denver, the team that he had brought to Washington was carrying forward the executive department's business in a manner unprecedented in U.S. history. For 23 hours the NSC, composed of key U.S. officials who deal with the total problem of defense, e.g., the Secretaries of State and Defense and the defense mobilizer, worked its way through a normal agenda. Next day, with the young (42) Vice President again sitting as chairman, the Cabinet met and pushed through the week's business. Out of the two meetings came a list of recommendations that will be passed on to President Eisenhower when he is well enough to receive them. Every cases, individual Cabinet members, having come to agreement with their colleagues, will be able to act on important matters without waiting for the President's approval.

Old hands in Washington were astonished by the efficiency and dispatch with which the Administration was operating while the President was sick. Explained Vice President Nixon, the acting captain of the Eisenhower team: "The President has set up the Administration in such a has set up the Administration in such a way that it will continue its policies, which are well defined, during his temporary absence."

The Rebuilt Cabinet, No President in history has given more attention to efficient organization and delegation of work in the executive branch. Under the Eisenhower reorganization, all major decisions funnel up to the President through a whole chart of special committees, boards and councils* that screen policy ideas. At the top are the NSC and the Cabinet. Matters of defense strategy move up through the NSC, broad questions of national policy in all fields by way of the Cabinet. When a problem reaches the President's desk, the facts presented to him are as reliable as the U.S. Administration as a whole can make them, and the choices before him are clearly spelled out. If possible, the NSC and the Cabinet try to send up an agreed Administration

function. Inestitably, the new system brought a new and more important status to the Cabinet meeting, Served by a sectary (a Bostonian named Max Ranh) who prepares an agenda for each meeting, circulates position papers in advance, briefs the presiding officer and follows up on decisions: the Eisenhower Cabinet meeting has become a truly effective formum for thrashing out policy matters.

This is a very different matter from the "strong" Cabinet of Lincoln's day, which included powerful, independent politicians to whom the President had to sell his policies. On the other hand, it is a far roy from the week position of the Cabinet under recent Presidents, especially under Feranklin Rossevelt and Harry Tuman. Says an old Washington hand: "In Rossevelt-Tuman days, a sure way to get an idea killed was to bring it up at a Cabinet meeting. Any important new

Operating under this system, the Administration can get along for a considerable time without the President.* Fortunately, at the moment, there is no major crisis facing the Government. To keep not as the Fresident of the Cabinet decided to send the President's White House "chief of staff" former New Hampshire Governor Sherman Admans, to Derwer. He arrived near week's end, and the staff arrangements for operation during the President's convalsecence

Key men of the Eisenhower Administration realize that maintaining an orderby state of affairs without the Chief Exceutive on hand can have its limitations. Said Secretary of Defense Charles E. Wilson; "I think we can get along very well for a reasonable number of weeks or months, but it is impossible to say that after a certain length of time, we wouldn't miss the boss—because we would."

Most Valuable Player. Just as he carefully organized the team and set up a system. President Eisenhower upgraded the vice-presidency and prepared Richard Nixon to run the team if and when it became necessary for him to do so. He expressed his philosophy about the vicepresidency at a news conference last May: "I personally believe the Vice President of the United States should never be a nonentity. I believe he should be used. I believe he should have a very useful iob. And I think that ours has. Ours has worked as hard as any man I know in this whole executive department," The President has another judgment about his Vice President: "The most valuable mem-ber of my team."

Operating under Ike's philosophy, Rich, and Nixon has made more of the job than any other Vice President in U.S. history, Defore Nixon, Vice President usually were insolated, distrusted and ignored. In Harry Truman admits that he was appallingly uninformed when Franklin Roosevel's death throat him into the President's office. He did not even know that the U.S. was building an anomic bomb. He U.S. was building an anomic bomb. Vice President. Truman was inclined to look upon himself as a member of the look upon himself as a member of

NIXON PRESIDING AT CABINET MEETING (JULY 22, 1955) From the older heads, a vote of thanks.

position that he can either accept, reject or revise.

The new kind of organisation results from the joining of two streams of U.S. experience: modern military methods and modern business methods. Both have modern business methods. Both have been considered to the problems that arise from the conflict hexeen the increasing need for specialization in parts of their organizations and the continuing need for unity in top policy of the continuing need for unity in top policy or the conflict hexeen the increasing need for the conflict hexeen the conflict has not considered to the conflict hexeen the conflict has not been and the top from the near-impossible task of having to choose between the prejudices of a particus conflict has not conflicted to the confliction of study, of interest or of hursacratic for study, of interest or of hursacratic for study, of interest or of hursacratic for study, of interest or of hursacratic forms.

4 Among them: committees on defense mobilization, economic policy, foreign economic policy, international financial policy, water resources, mineral resources, transportation policy. Government organization, operations coordination and federal-state relations. plans were taken up with the President privately. If a Cabinet officer brought them up at the Cabinet meeting, the idea would probably be scotched by someone

else at the table." "We Would Miss the Boss," Under the Eisenhower plan, with a complete set tion policy, the key officers of the Administration last week quickly set the tone for carrying on. First, they agreed that no delegation of presidential powers was required. Normal Government business would be carried on by each official as usual; issues that necessarily required presidential action would be held in abeyance as long as possible: the Vice President would continue to coordinate the work of the executive departments, as he had done before when the President was away, and as deputy when the President was on hand. It was a plan for government by consensus, with the Vice President acting as the key man in bringing about a consensus,

Serious conclusional and lead consilications arrivately the desiration of previouslial papers where the President is too III to attend to publications. The Constitution asys that "fic case of the Removal of the President from Office, and the Previouslian Constitution and the Constitution and the Constitution of the Constitut

legislative branch, who could not expect to share the confidences of the President. Explains Truman: "The President. by meeting the president of the President of the President remains an outsider, no matter bow friendly the two may be. There are how friendly the two may be. There are none is the fact that both the President and Vice President are, or should be, astute politicians, and neither can take the other completely into his confidence."

With Dwight Eisenhower and Richard Niron. his whole concept was changed. Eisenhower was the first President in U.S. history to give the Vice President important new duties. Last week's meetings marked the tenth time that Nixon had third time that no like NSC, and the third time that no like NSC, and the continue that the NSC and the continue that the NSC and the president has been supported to the kept the Vice President fully informed on all aspects of the Administration's poli-

cies and actions. In Washington and elsewhere. Nixon has worked constantly as the President's imbassador, elucidator and troubleshooter. As a key liaison man between Capitol Hill and the White House, he has been highly effective in advancing the Administration's position on big issues, e.g., defense spending and foreign aid, and on less momentous but nevertheless important political problems, e.g., Joe McCarthy. As the President's representative Nixon traveled 45.539 miles on a trip to and absorb information. Nixon was often called when a major speech was needed to set forth the Administration position, Early in 1954 he made the Administration's main reply to Democratic attacks and stated its position on the Mc-Carthy issue: last month he flew out to the National Plowing Contest at Wahash, Ind. to outline the Administration's farm policy.

Checking on Checkers, When the President was stricken in Denver, the Vice President was the first person outside the White House to be informed. He was sitting in the living room of his white brick home in Washington's Spring Valley, reading the evening newspaper, when the call came from Presidential Press Secretary James Hagerty, Stunned, Nixon walked slowly back to the chair that he had been sitting in, and sat for a moment on the edge of it. Then he telephoned his old friend and confidant of his days in Congress. Acting Attorney General William P. Rogers, who immediately left home for the Nixon house. Not until the first newsman called to ask for comment did the Vice President tell his wife the news. Overhearing the conversation, the eldest of their two daughters, Patricia, 9, immediately went to her room to color and cut out a get-well card for the President.

nut a get-weit card for the President. Within a few minutes after the first news flash about the President's heart attack, the Nixon telephone began to ring. To make the telephone calls he had to make, the Vice President took refuge at Rogers' house in Bethesda, Md. There

Nixon, Rogers and Presidential Aide Wilton B. Persons, occasionally telephoning other key men in the Administration, discussed their plans until 2:30 a.m. When Nixon went to bed in the Rogers' guest room, there was more than concern for new problems to keep him awake. On the third floor directly above his room, the Rogers' son Tony, 15. was participating in a ham radio contest, talking to Canadian hams in Morse code; during the night a call came from Denver to report on the President's condition; then the Vice President's hay fever began acting up. Said Nixon later: "I didn't sleep at all that night.

On his way home the next morning. Nixon realized for the first time that an enlarged detail of Secret Service men (three instead of one) was guarding him. cocker spaniel. Checkers, were faithfully

reported.
"We Are Very Grateful." Acutely aware of the delicacy of his position, Nixon was cautious about every move. At no time did he take any step indicating that he was attempting to usurp any of the President's powers or prerogatives. When he wanted to talk to key men in the Administration, he went to them instead of calling them to his office. At the White House, he stayed away from the President's office, worked in a conference room. He arrived early, as usual, for the NSC and Cabinet meetings, made no effort at an "entrance"; he sat in his customary chair, leaving the President's chair empty. Much of his work was done in his rosecarpeted hideaway office on Capitol Hill a

THE NIXONS & EISENHOWERS IN CHICAGO (JULY 11, 1052)

As he came out of Washington's Westmoreland Congressional Church with his family, newsmen finally surrounded him. 'Let's go over to my house,' he said. There, in the living room, he spoke his first public words since he had received the ness of the President's illness: "I find it rather difficult to express in words feelings that are so deep. I know that you obviously have a number of questions on various subjects, but the only comment I will be to express the concern that I will be to the expression of the expression of the concern that I will be to the concern that I will be to the expression of the concern that I will be to the expression of the concern that I will be to the expression of the concern that I will be to the

From then on. Nixon's every move and every word were doggedly watched by reporters and given beady-eyed examination by politicians. A bevy of newsmen followed him wherever he went, camped on the street outside his house until he fixed up a basement room for them. Even the forays out of the house by his famed forays out of the house by his famed

As Nixon went about his newly shaped dutes a California politician observed that "what he does in the next few weeks will make or break him." Conscious of this view and sincerely devoted to the objective of keeping the Administration running properly. Nixon by week's end was visibly tired and careworn from the task of trying to be right, though not

Insident, first week, he had won new resport, among the older men working with him. At the end of the Cabinet meeting. Secretary of State John Foster Dulles rose and told his colleagues: "I must say that a real work of thanks is due the Vice President for the way he has handled himelf during this period and for the way in which has conducted this meeting the very grateful to voice."

Reputation in Moscow. As speculation about the political effects of President

Eisenbower's illness continued to much room, Nixon naturally stood in the center of the political limelight. While Nixons's knowledge, experience and position are important political advantages, he has important political advantages, he has important political advantages, he has important political standard proposed for the control of the Nixon Political Control of the Democratis: their constant flow of the Democratis: their constant flow of the Democratis: their constant flow of anti-Nixon propaganda undoubtedly will obsupport as upponents in his own party to support and proposed proposed

There are many reasons for the Democratic propagandists' concentration on Nixon. The most obvious is the political disadvantage of attacking a figure as popular as Eisenhower, Normal party antagonism has to find an outlet: Nixon has been it. Many liberal Democrats who changed their minds about the Alger Hiss case never stopped resenting the fact that Congressional Investigator Nixon arrived early at the conclusion they reached much later, or that in the campaign Nixon most effectively pressed home the point that Adlai Stevenson was a character witness (by deposition) for Hiss at his first trial. In 1952 and again in last year's congressional elections-Nixon used the Communist infiltration issue against the Democrats. Since he was a key man in the successful exposure of Alger Hiss, and since there was no trace of McCarthyism in the way he handled that case, he has been effective on the issue.

Furious Democratic spokesmen have charged that Nixon smeared Democratic by Charging that they were soft on Communian. The record shows that Nixon his mountain that the same control of the same, but that he never adopted or the issue, but that he never adopted and the issue, but that he treason. Pointing out that he was not charging the party with disloyalty. Nixon charging the party with disloyalty. Nixon the very different charge that the Democratic Party is a proposed to the community of Pranklin Community and to not often failed to understand and to not often failed to the fai

Nixon's reputation on the Communist issue obviously has traveled far. In Moscow last month, Communist Boss Nikita Khrushchev brought up the subject in a conversation with West German Chancellor Konrad Adenauer.

Adenauer: But you can't really distrust the Americans. You've met Eisenhower. You know what kind of man he is.

Khrushchev: Oh, it's not Eisenhower we are worried about; it's this fellow Nixon. Adenauer: But after all he is only Vice President.

Khrushchev: So was Truman. Plugging for Coptain. While Nixon is widely known and liked among the leaders of his own party across the U.S., he has trouble in the Republican organiza-

REPUBLICANS

Party Pulse Beats

Publicly. Republien National Chair man Leonard Hall was himming over with confidence. "Our campaign plans and strategy remain unchanged", reife de to a Bangor, Me. audience last week. "Were years." Private week of the strategy remain mouralul. Said he to a friend: "I'm in an mouralul. Said he to a friend: "I'm in sur mouralul. Said he to a friend: "I'm in supplier and private leaves are the strategy of the said of the said

One encouraging sign was the absence of panic among Republican. Not until two days after the anticasts. Not until two days after the anticast and the first long-distance call from a high-level Republican come into G.O.P. national beadquarters. The caller was told to make the control of the control of the control of the caller was told to make the caller was told to the caller was told to the caller was told to the caller was to the caller was

"Under No Circumstances." Among the most striking evidences of a feet-onthe-ground Republican posture was the general willingness to face reality. The merest handful of Republican leaders still clung to the idea that Dwight Eisenhower might run again for President, Said Louisiana's National Committeeman John Minor Wisdom: "I would rather see a sick Eisenhower than a well Democrat in the White House." Crooned Illinois Senator Everett Dirksen: "'Duty' is the shiny. iridescent word the President learned at West Point. The President knows and will know where his duty lies." To Ev Dirksen, Ike's duty clearly lies at the head of the ticket on which Dirksen will be running for re-election. But the vast majority of Republican leaders seemed to agree with Vermont National Committeeman Edward Janeway, who said that "under no circumstances" should Eisenhower run again, and Oregon State Chairman Wendell Wyatt, who said: "We would not want to jeopardize his later years.

Having already accepted in their own minds the probability that Ize will not be a candidate, the Republicans were able to turn their attentions to another question: Who will run? Last week the IFall Street who will run? Last week the IFall Street who will run? Last week the IFall Street party and the probability of the IFALL representation about, who they could state their party's stronger candidate. The their party's stronger candidate, reading the "Automotife Solution". Leading the

list was Vice President Richard Nixon.
Said Wisconsin State Chairman Philip G.
Kuehn: "Nixon has the very attibutes
Mr. Eisenhower has said the party needs:
intelligence, youth, and vigor." Said Nevada State Chairman Thomas A. Smith:
"Nixon can bring to the presidency the

same basic principles of honesty and efficiency in government and will continue in other matters what President Eisenhower has so ably started." Wyoming's Governor Milward L. Simpson added a strong enasking that his name not be used, thought that President Eisenhower should resign so as to give Nixon a chance to prove himself in the presidency, thereby "automatically solving G.O.P. problems at [the] coming conventions.

Mentioned with remarkable frequency was Pennsylvania State University President Milton S. Eisenhower, the President's brother, Said Nevada Governor Charles Russell: "Milton Eisenhower is one of the nation's outstanding men and a personal confidant of the President who would carry the Eisenhower name into the 1956 election." Oregon's State Chairman Wendell Wyatt put Milton Eisenhower at the top of a list that included Presidential Assistant Harold Stassen. Nixon. Chief Justice Earl Warren and Paul Hoffman, Maryland's Governor Theodore Roosevelt McKeldin named Milton Eisenhower. Warren, former New York Governor Thomas E. Dewey and General Alfred M. Gruenther, Wisconsin's Governor Walter J. Kohler cited Milton Eisenhower along with Nixon and Treasury Secretary George Humphrey

"Damn Sure." Earl Warren, despite his April avowal that he would not accept a nomination, figured strongly in the plans of many Republicans, who recalled that a Gallup poll last April showed Warren running neck and neck with Adlai Stevenson in a test of voter popularity. It was carefully noted, especially by those who like him least, that Manhattan Lawyer Tom Dewey was off on a world tour during which, he said, he would discuss social, economic and political questions with foreign leaders.

Harold Stassen, whose political stock has been on the downgrade ever since he got trounced by Dewey in the 1948 Ore-

WARREN

gon presidential primary, was another whose name was on many Republican lips last week. Among favorite-son possibilities whose chances were taken seriously by some Republicans were Massachusetts Governor Christian Herter and Washington's Governor Arthur Langlie, who, when told that he had been mentioned, said: "If they're thinking about me, it won't be for long. I know politics too well for that,"

One of the few who offered no opinions about 1956 Republican possibilities was the man who will have the most to say about them: President Eisenhower himself. But there was no doubt that he would take a part in selecting the nominee. Early in the summer he invited a small group of Congressmen to the White House for lunch and told them: "I don't know whether or not I am going to run, but this I do know-I will want to be damn sure that whoever does run will be a man whose views are consonant with the way I think about things."

THE PRESIDENCY

Waiting

The strains of Star Dust, played by the Melachrino Strings, wafted from the eighth-floor tower room at Denver's Fitzsimons Army Hospital. An idle glassene oxygen tent was placed outside the door. in the flower-banked corridor. Inside the room, the world's most important hospital patient rested comfortably and listened to the music. A week after his heart attack. President Eisenhower was making steady progress toward recovery,

The President's path of progress was measured in small but significant steps. After four days, the use of narcotics was dropped (although Ike continued to receive anti-coagulants, as a precaution against blood clots, and Seconal, a sedative, to help him rest). He was gradually 'weaned" from the oxygen tent. The periods of dozing slacked off, and the Presi-

STASSEN

Between the best shape and the worst spot, a good fighting chance.

outside world. When Press Secretary James Hagerty popped in for a brief visit. Ike asked him how the affairs of the nation were going. "Just fine, Mr. President," said Hagerty. "Everything is fine." Items on the presidential chart:

Monday. President Eisenhower ate a good breakfast, his first full meal since the heart attack. His fever subsided to normal. The oxygen tent was removed for brief intervals during the day, and Dr. Paul Dudley White, the famous heart and interview specialist (see below) returned to Boston.

Tuesday. The First Lady and Major John Eisenhower visited the President for two 15-minute periods. Around the hospital and presidential headquarters at Lowry Air Force Base, an air of optimism replaced the tense anxiety of a few days earlier.

Wednesday. Major Eisenhower returned to duty at Ft. Belvoir, Va. Telephone traffic dropped from 500 calls a day to a manageable 200. Although no flowers were permitted in the President's room, bouquets from well-wishers continued to pour into the corridor just outside (after being carefully inspected by the Secret Service). The previous day. the President had remarked to his wife and son that it would be pleasant to hear some "soft music." So with a nod from the doctors. Colonel Robert Schulz, the President's military aide, brought a taperecording machine into Ike's hospital room. For an hour Ike listened dreamily to three albums: Moods in Music, Quiet Music, and Music for Daydreaming.

Thursday. The cardiographic checks on the President's heart showed satisfactory healing, and the doctors reduced the daily cardiograms from two to one a day (just before breakfast). Use of the oxygen tent was discontinued altogether. Ike listened to music by Bach, e.g., Air on the G String, Sheep May Safely Graze, which he had requested, and a pretty Army nurse, First Lieut, Lorraine P. Knox, read to him from the Reader's Digest. Mamie Eisenhower's bedside visits became longer and more frequent. The First Lady took her lunch in the President's room, and read selected news clips-mostly editorial comment about his illness. He was informed on the progress of the World Series, but showed little interest,

Friday. The President's appetite continued to be good, and at breakfast he asked for, and got, a strip of his favorite beef bacon. But his doctors restricted him to a rigid 1,600-calorie-a-day diet to keep his weight down. During the day two hospital orderlies lifted Ike to a new hospital bed that can be raised and lowered from the floor by an electric motor. The apparatus will make it easier for the President to get in and out of bed when he is allowed to walk. Lieut. Knox read to him from Sir Arthur Conan Dovle's Sir Nigel one of Ike's favorite books. Mamie Eisenhower brought one message, from Soviet Marshal Georgy Zhukov, to Ike's attention: "I just now learned of your illness and received this news with the deepest

feelings of sorrow. With all our hearts my family and I wish you a speedy

recovery and long life.

At week's end Presidential Assistant Sherman Adams flew into Denver to take charge of the Lowry headquarters, and President Eisenhower resumed his authority as Chief Executive. Adams brought with him two lists of State Department recess appointments that needed the President's signature. With his doctors' approval. Ike held the papers in the air and signed them. "Mr. President," said White House Physician Major General Howard Snyder, "you only have to initial these

PRESIDENTIAL ASSISTANT ADAMS The initials became a signature.

papers." Ike looked up and smiled, "Well, Howard." he said. "I think I know more about it than you do," and signed his name in full.

The day after his arrival in Denver, Sherman Adams was permitted to see the President for six minutes. The conversation was limited to Adams' recent trip abroad, and Ike was particularly interested in his fishing expeditions last summer in German streams where Ike himself had fished, and in Turkey, at the headwaters of the Euphrates River, where Adams fished for golden trout.

The Sunday evening medical bulletin described the President as "tired." but added that his pulse, temperature and blood pressure were normal. As the patient neared the end of the first critical fortnight. Dr. White prepared to fly back to Denver to work out a program of convalescence with the other doctors. If all went well, the President would be flown back to his Gettysburg farm in two or three weeks. After another month of convalescence there, he may be able to return to Washington and full duty.

The Doctor's Report

Dr. Paul Dudley White, 69, is one of the world's most eminent heart specialists. In the pursuit of his notable career he has taken electrocardiograms of circus elephants, and once, in the icy waters off the coast of Alaska, he even recorded the heartbeat of a beluga whale by means of an electrocardiograph wired to a pair of brass-tipped harpoons (TIME, Aug. 25, 1952). Since the whale was small as well as in an understandable state of excitement. Dr. White was not fully satisfied with the result. He still yearns to record the throb of a heart of a tranquil, un-

harpooned and bigger whale. Dr. White is as talkative as he is enterprising. In Denver last week, just before he returned to Boston after two days of consultation with the five other physicians attending President Eisenhower, he presided over a strange press conference. He began the conference by explaining that he was going home "partly because the President's condition is so satisfactory and partly because he has such excellent attention here." He then gave a lengthy dissertation on coronary thrombosis and continued with a curious dialogue in which Press Secretary James Hagerty read the morning medical bulletin sentence by sentence, and Dr. White explained each sentence. Excerpts:

Hagerty (reading from the bulletin): The President's condition continues to be satisfactory without complications

Dr. White: I might add that they can come. For many people some of them would have already come, if they had been very, very ill. But they can still come . . For the first two weeks we keep our fin-

gers crossed Hagerty (reading): He had a good bowel movement.

Dr. White: Now I put that in-which I insisted be put in, and I am sure the others agreed to it because it is. I said the country will be very pleased-the country is so bowel-minded anyway-to know that the President had a good movement this morning, and it is important. It is good for the morale of the people for one thing . . . Also he perspired a good deal in the first 36 hours, and so he lost fluid that way. He replaced it. He drank a good deal and has kept up all right. But that is one of the reasons why some patients don't have any bowel movement for several days. So this is an encouraging point.

Hagerty (continuing the bulletin): He enjoyed a breakfast of prunes, oatmeal, soft-boiled egg (singular), toast and milk. Dr. White: We felt that this was rather

important for two reasons. In the first place, he enjoyed it-he wanted it. Secondly, breakfast is often the best meal of many patients who have not eaten through the night, and he hadn't eaten much during the past 24 to 36 hours anyway . . . Some people might say, "Why did he have such a very big-sized breakfast?" It was not very big-pretty soft, easily digested. Why did he have eggs. since eggs now are being deprecated

against? We have to supply some fat to the hody . . .

Hugerty: The President had a slight fever late yesterday afternoon . . .

Question from a reporter: How much? Hagerty: Let me finish. I will leave that to the doctor. (Reading)... as is usual in such cases, but his temperature is nor-

mal this morning.

Dr. White: We expect, as I have already said, we expect to have fever—a little fever. And this is just according to thoyle... We measured rectally. Until fever above the top normal. But, as we expected yesterday a fremon late, he had a rectal temperature of 10:14. A rectal temperature is if higher, normally, than a requivalent of 100.4 by month. So that was the highest temperature.

Question: What are the prospects of the President's complete recovery?

Dr. White: They are reasonably good. But we can't tell. As I say, we can't tell yet. Each day has to take care of itself. and the first two weeks are important... Question: You were quoted before in

This is from experience—3; or 30 years which is from experience—3; or 30 years which is the first of the firs

physically able to do it?

Dr. White: Oh, yes.

This last answer made headlines-and helped publicize a point that Dr. White, a former president of the American Heart Association, has been making for years, The point: heart-attack victims need not spend the rest of their lives as invalids. But when applied to the President of the U.S., Dr. White's answer seemed to hold out the probability that Ike would receive medical advice that he could run again. To correct this impression, Dr. White appeared on a TV show with Dave Garros way. Asked if he thought it would be possible for the President to serve a second term, he replied: "Many things are possible that may not be advisable . . . If I were in his shoes I wouldn't want to run again, having seen the strain.

Later in the day Dr. White granted still

another interview-this time to explain his television remarks, "I indicated that I. personally, as Paul D, White, would have no great desire to undertake such a strain as that imposed upon a President of the U.S.A. This remark could be interpreted as meaning that I would give such advice to the President, Far from it, If the President has a good recovery, as he seems to be on the way to establishing, and if he desires to continue in his present careerwhich could be, of course, to the great benefit of this country and the world at large-I would have no objection whatsoever to his running again. But that remains for the future to decide.

On the television show Dr. White dis-

Dr. PAUL DUDLEY WHITE One word led to another. closed that he had been talking to Presi-

dent Eisenhower, too. "I talked at some length with the President last Monday." he said. "to tell him just what the situation is as we see it medically. He took all this in and I'm sure he'll be an excellent patient."

DEMOCRATS

"A Social Visit"

During the first week of President Elsenhower's illness, nearly all Democrats tiptoed in the political corridors and spoke in hushed those that told of genuine personal sympathy for Ike. Among Democratic presidential hopefuls. only Stevenson (who expressed his fervent hope for the President's recovery) was visibly active—and he was obviously emburrassed the fulfield on the Tourse on him while he fulfield on the Tourse on him while he fulfield one. Texas engagements of long standing.

In midsummer, Stevenson had con-

In midsunimer. Stevenson had contracted to make a nonpolitical speech as part of the "Great Issues" series being put on by the University of Texas. A little later, he accepted an invitation from Texas Senator Lyndon Johnson, then still in the hospital after a heart attack, to visit Johnson's 300-acre ranch near Stonewall (66 miles west of Austin).

In Austin's Commodore Perry Hotel. Adlai Stevenson spent 35 minutes dosseted with senior Texas Democrat and House Speaker Sam Rayburn. That night, at the university. Stevenson's subject was "America, the Economic Colossus." Stevenson had some doubts about the colossus. Said he: "I am not a prophet of agloom. I am not a prophet of any kind whatever. Nometheless, I grounded the other day when a leading politician said commodified to the state of the state of

"X" Moris the Spot. After the speech seven son and Rayburn drove to Johnson's ranch, arriving shortly before mid-night. By next daybreak, reporters and cameramen had already begun to gather and the seven seven seven to gather the seven seven on a tour that included the house where he was born, his first school, and the family cemetery. On a vacant plot next to the graves of his grandparents, Johnson marked an "X" with his foot. "Sixty I was going to he."

Then he gave his version of the Stevenson visit. No politics had here discussed, said Johnson, and as far as he was concerned none were going to be. The visit had absolutely no relationship to any political situation arising from Eisenhower's illness. As a heart-attack victim himself, Johnson said, he felt a certain kinship toward like; besides, he considered the President a close personal friend. As for exerting his influence in the Senate on can't turn, the Senate into a nominating convention..., I wouldn't make precinct captains out of the Senators even if I

Without Hotred. Having stated his position, Johnson returned to join Stepesition, Johnson returned to join Stepesition, Johnson returned to join Stepesition, Johnson returned to the Johnson Johnson sagain steps of the Johnson sagain circumstances of Adlais visit, Rayburn said he agreed with everything Johnson had said. Were not lattice that the Johnson Joh

Stevenson insisted that his meeting with Johnson and Rayburn was "a social and friendly visit" and was "not political in any sense." Against the presistent attempts of newamen to get him to explain its political intentions. Stevenson finally went this far: "My intentions are no the wishes of the Democratian what I have the wishes of the Democratian which was the wishes the wi

HIGHWAYS

Ohio Express

In 1796 Ebenezer Zane, a hardy Marylander, contracted to clear a bridle path across lower Ohio in return for a land grant of 3 sq. mi -a transaction authorized by Congress and executed by President George Washington (who owned vast tracts in eastern Ohio himself). Part of Zane's Trace became in time the National Road (now U.S. Highway 40), which linked the East with the wide-open Midwest and helped populate Ohio with a swarm of new settlers (250,000 in ten years alone). Last week, some 100 miles to the north. Ohio completed a new kind of link between East and Midwest: the 241-mile, \$326 million Ohio Turnpike. Even before its formal opening, the

Even netore its tormal opening, the holio Tumpike held records. It is the longest stretch of superhiphway ever completed at one time; of all the major postwar U.S. tumpike projects. It is postwar U.S. tumpike projects, and within its cust within its cust the Tumpike Commission ended up with money to spare, although construction ran to \$41,300,000 per mile (seeding grass alone cost \$42,000,000).

Blackstone Boulevard, Ohio's project was inspired largely by the phenomenal success of the prewar Pennsylvania Turnpike. Yet the state legislature voted against it in 1947, approved it in 1949 by a single Senate vote only after bitter debate.

The state invested little cash in the Turnpike Commission. When the turnpike bonds went on the market in 1937, private investors, looking toward revenues from tolls, bought up the entire \$3.50 million in one day, Before the market closed that day, the commissions which was the commission of the comm

vard. No concrete was poured at all for the first four years. Then in late 1953, an army of roadmaking machines began to roll on two ten-hour daily shifts, and the turnpike shot across Ohio at a rate sometimes exceeding one mile a day.

Nine Seconds to See, As projected, the Ohio Turnpike would have startled U.S. motorists with a big switch: fast cars in the outside right lane and slow traffic in the left lanes, and service facilities on the center strip rather than the roadsides. The commission turned down these innovations. As built, the turnpike is simply an ordinary, superb superhighway.

Photoelectric eyes and electronic machines automatically to tu pul charges chines automatically to tu pul charges (top: §8 for an auto, §50 for a 4-0-ton truck). The 16 service plassa provide both kingsise pienic areas and kid-sise legible at 900 ft.—enough for a pieze, reading at 6g mp.h., the speed limit. All pridges have been built as separate twin structures: in all, overpasses span four major rivers, 38 streams, 41 millioad major rivers, 38 streams, 41 millioad a saving of nearly 33 hours driving time a cross Ohio.

Moine to Mexico? The new highwayskirting Akron. Cleveland and Toledoconnects the Pennsylvania Turnpike with the one now being built across northern Indiana. By next fall motorists and truckers will be able to drive 812 miles. Irom Manhattan to Chicago's outskirts, without running into a single traffic light or crossroad. Total toll charges: \$10.54.

Ohio expects 14 million vehicles the first year, and eventually an annual revenue of \$35 million—enough to pay off the bonds by 1973, a good 20 years ahead of time. However, as in Pennsylvania, the tumpike revenue will probably be plowed tumpike and the property of the

the state toward Cincinnati and St. Louis. Overall, in 22 states, a network of toll

roads built or planned is now webbing fast across a vast segment of the U.S. from Northeast to Southwest. In 1050 all U.S. toll roads together ran to only 439 miles. The total has since expanded enormously; as of this week 1,712 miles are in use, 1,527 under construction and 5,622 more planned, Total cost: \$10.7 billion, repayable by road users directly at no cost to taxpayers generally. By 1965, highway experts predict, motorists will be riding nonstop-for a price-on turnpikes from Chicago to Miami, from the East Coast to Omaha, and from Fort Kent, on Maine's Canadian border, to the edge of Mexico.

ARMED FORCES

Common Sense Revisited

For nearly two months, 21-year-old Eugene Landy, No. 2 honor graduate of the U.S. Merchant Marine Academy, had been officially dishonored. In refusing him the usual ensign's commission, the Navy said he had been "extremely close" to his mother, a former Communist.

As the Landy case flared across U.S. headlines. Navy Screetary Charles Thomas appointed a special board to review the decision. While the board pondered and Landy entered Vale Law School, the Air Force and Coast Guard cleared two men involved in similar kin-guilt cases, and in the control of the control o

talking to Landy and making a personal "common sense evaluation." announced his own findings: Landy's association with his Communist parent was "the natural relationship of mother and son and not a sympathetic association with her political beliefs." Clearing Landy and bestowing his be-

lated commission, the Secretary said: "I could not ignore one of the fundamental principles on which our American way of life is based, and that is the opportunity of each individual to progress, and succeed on his own merit."

IMMIGRATION

Bridges' Last Bridge

After 17 years and two trips to the Supreme Court, the U.S. Government has given up trying to deport Harry Bridges. 54. the Australian who rose to boss West Coast longshoremen with the help of the Communists and his own brass-bound nerve. Having lost to Bridges in 1939. 1945, and 1953, the Government tried again last summer by seeking to prove Bridges lied during his naturalization in 1945, when he denied he had ever been a Communist. That failed when a federal judge found the charge unsubstantiated leaving the way open for another endless round of new trials. But last week the Justice Department reached a weary decision: no appeal.

FOREIGN NEWS

THE NATIONS

Time & Place

High above Manhattan's Park Avenue, the Big Four foreign ministers met last week to talk about the Geneva meeting, Russia's Foreign Minister Molotov joined the Westerners in John Foster Dulles' Waldorf-Astoria Tower suite and came to quick agreement on Geneva's procedures and duration (about three weeks). It was smooth, pleasant, almost routine. The diplomats' minds were on other things.

Though the subject was not remotely on the agenda. Britain's Haroid Macmillan abruptly blurted out what was proccupying the West. If Russia is sincerely trying to ease world tensions. Macmillan demanded of Molotov, why is Russia's satellitic Zechoslovakia selling arms to Egypt? Turning on his best wide-eyed look, Molotov professed to know nothing about it.

For months the Western allies, concerned with mortising Western Germany into the NATO ramparts, had given little if any thought to the seuthern end of those ramparts. Then, suddenly, the whole Middle East seemed in jeopardy.

Nasser's deal with Communist Czechoslovakia (see below) involved more than jet planes, tanks, and heavy artillery to upset the carefully fostered balance of arms the West had maintained between Egypt and Israel. It involved a possible intrusion of serious Communist influence into a part of the world dominated long, if unsurely, by the West. There was supposed to be a second line of defense against such an occurrence-the partnership of Turkey and Greece within the NATO alliance. But by last week, that partnership was itself in danger of disintegration. Far from acting like NATO allies, the Greeks and Turks were bitterly at odds over Cyprus. Turkey, whose 440.000-man army is the West's strongest bulwark in the area, was so badly in debt that last summer private oil companies cut off its supplies until the government pays in cash, Cyprus itself, linchnin of the NATO area defense, was seething with pent-up troubles which the Greek radio, speaking for a shaky government, urged on in the apparent hope that recriminations against Britain and the U.S. would alleviate discontent at home.

To check the spread of trouble Washington last week sent one of its best troubleshooters to warn Nasser against the Communists' poisoned apples. Britain sent its top soldier to impose order on its East Mediterranean bastion (see below), Russia, meanwhile, sent a polite note to all three Western powers to express its belief that any nation can buy weapons wherever it pleases. To prove its point, Russia already was busy offering its wares to Syria and Saudi Arabia. In other words, this talk of disarmament and the "spirit of Geneva" was all right in its place and time-but not in the Middle East while the other fellow's back is turned.

ALGERIA

Walkout

The Foreign Minister of France was outraged. "The decision you are about to make." said Antoine Pinay to the U.N.'s General Assembly. "is more serious for the United Nations than for France, for the whole future of our organization is at stake."

But threats were not enough. In a froth of anticolonialism whipped up by the 14-nation Arab-Asian bloc, and with the united vote of the Soviet bloc, the General Assembly overruled its powerful Steering Committee (for the first time on a major issue) and voted to debate France's conduct in the troubled North African region of Algeria. The rebellion carried by only

duct in the troubled North African region of Algeria. The rebellion carried by only one vote—38 to 27*—but that one vote was enough to plunge the U.N. and France into dramatic antagonism.

Tomorrow's Consequence. Trembling with anger. dapper Antoine Pinay c limbed back to the Assembly rostrum. "Twice I

have warned the Assembly of the con-

sequences of a violation of the Charter. An assault of passion and demapogy has led the Assembly to disregard the recommen

dations of its General Committee . . . My government refuses to accept any intervention of the U.N. . . . My government will consider as null and void any recommittee.

mendation which the Assembly might make in this connection." Pinay paused. "I must add . . . that I

do not know what will be the consequence tomorrow of this vote." Pinay walked stiffly back to France's place on the Assembly floor, gathered up his papers and his aides, and led them silently out of the United Nations.

From Manhattan's Waldorf-Astoria Hotel, Pinay telephoned Paris to report his action to Premier Edgar Faure. "You did the right thing by walking out." said Faure. He gave Pinay fresh orders, and

the right thing by walking out." said Faure. He gave Pinay fresh orders, and next day they were carried out. Pinay and his staff few home. There, to show France's anger at the Soviet vote in the Assembly, Faure and Pinay immediately to Russis. The Centre scheduled visit to Russis. The Centre of the Centre of the to Russis. Legally, the French had a strong case against U.N. meddling in the affairs of "metropolitan France." Morally, they had an obligation to keep their unkept promises to the Marsian of the M

MOROCCO

Slow Exit

For much of last week. France's reputation abroad and the fate of its government at home rested in the shaky hands of a hesitant old man—Morocco's Sultan Sidi Mohammed ben Moulay Arafa, All week long. Foreign Minister Antoine Pinay telephoned anxiously from Manhattan, in hopes of favorable news to influence the U.N. Assembly vote on the Algerian situation. From Paris, Premier Edgar Faure telephoned urgently to Morocco's Resident General Boyer de Latour; unless Ben Moulay Arafa had "voluntarily" departed before the National Assembly met this week, the Faure government was doomed.

By midweek De Latour had worked out a compromise with the leaders of the Présence Française: Ben Moulay Arafa would leave, but turn over the royal seal, symbol of the Sultan's authority, not to the Recency Council but to a member of his own family. The old Sultan seemed his own family. The old Sultan seemed his own family. The fact of the succession of

SULTAN BEN MOULAY ARAFA Twelve hours too late.

Rabat soon after he returned from the Sultan's palace. El Hajou took one look at them. made a dash for his big white Cadillac, and roared off into the dawn. The police, full of pro-Arafa men, were careful and to catch his

Poor Listener. With the Viaire out of touch, the Sultan gave in. Shortly before dawn next day, light tanks and armored cars converged on the palace. Squads of police materialized on street corners: toops lined the roads to the airport. At 7 am, the Sultan, leaning heavily-on a gold-headed came, his eyes velied behind dark glasses, emerged from his paliance of the street of the sultan, leading time to the hird and last time in his unbappy are reign (on both previous occasions, someone had tried to assessinate him.)

At the airport, the old man's lips quivered as Resident General de Latour pronounced the incantatory words of political exorcism over his head: a letter from President René Coty praising "the high mbility of the sentiments which once again uside Your Majesty in the serious decision you have been pleased to take. Ben Moulay Arafa scarcely listened, laboriously climbed aboard the waiting plane. An hour later, the plane landed at Tangier, where Ben Moulay Arafa will live at French expense in a hastily re-habilitated villa which once belonged to another thronelies. Sultan of Morocco.

Our Cousin Mouloy, Behind him, Ben Mouloy, Arraf, left decrees announcing his decision to leave "without in any way relinquishing our rights," and deleasting "to our cousin Mouloy Abdullah ben Mouloy Abdel Hafid the task of taking care of matters relative to the crown." The nationalists were not plessed. They knew little about Hafid except that he is a stout, 50-year-old man working in a stout, 50-year-old man working in a stout, 50-year-old man working in a hard hafid appointment would not "exclude". Faure's plan for a three-man Regency Council.

Arafa's departure came twelve hours too late to help France in the U.N. But it probably staved off, for a while at least, the fall of Faure's government.

EGYPT

Arms & the Man

At an armed-forces exhibition in Cairo, thousands of army officers listened while Egypt's Premier Gamal Abdel Nasser make a peech, Subject: why the Egyptian and the American State of the Critical State of the Critical State of the Critical State of the State of the Critical State of th

"Heavy arms," said Nasser, "are controlled by the his powers, and these agreed to provide Espyt's armed forces with arms, but on certain conditions. All deals that she would only supply us with a rule that she would only supply us with a rule if we refrained from criticians her attitude in North Africa, which was another any of saying that we should shandon our than the should shandon our should be a supply to the should be a supply to the should shandon our sees, making it a condition that we should sies, making it a condition that we should

sign a mutual-defense agreement or pact
. . The United Kingdom said she would readily supply us with arms, but she has only sent us very small shipments."

Then came the startling announcement: "We received an offer from Czebnoścovakia showing readiness to supply us with as many weapons as our army required, and on a purely commercial basis in return for Egyptian products such as cotton and rice, which I accepted with thanks. An agreement was concluded to this effect between Egypt and Czechosłovakia last week."

Risky Course. The arms that Nasser needs are tanks, jet planes, heavy artillery and a few naval craft. Czechoslovakia's famed Skoda armament works, now named

for Lenin and controlled by the Soviet army, is well equipped to supply most of the arms. But to make effective use of Czech weapons, the Egyptian army will be obliged to set up a maintenance supply line running back to Prague, and, therefore, to Moscow, Thus Russia can secure a firm and influential hold on an area hitherto dominated by the West.

Nasser, no Communist, gave his reasons for taking such a risky course. "We insist." he said, "on securing arms for our army to safeguard our revolution and our independence, and to preserve our dig-The fact that Israel (pop. 1,700,-000) has an army more than twice the size of Egypt's (pop. 22.5 million) is a constant source of humiliation to Nasser's military junta. It enables Israel to move in and out of the demilitarized border zone of El Auja with impunity, as it did last week, and it gives (to Egyptian ears) an intolerable acidity to Premierdesignate Ben-Gurion's statement on the eve of Yom Kippur: "I hope Egypt won't be foolish enough to try to blockade the Gulf of Agaba against us. We can beat them . .

To meet this, or any other Israeli challenge. Nasser has a mixed assortment of arms, including 32 obsolescent Centurion tanks, eleven Meteor and 26 Vampire jets and some 150 anti-tank guns, given to him by the British. But the British, who have no confidence in Nasser's long-range intentions, have also provided the Israelis

Flat Rejection, The U.S. has several times offered to supply Nasser with arms. Neither the Mutual Security Act nor direct-grant aid requires a mutual-security treaty, but a standard form of agreement is demanded by act of Congress. Said Nasser: "We flatly rejected these conditions partly because this is an infringement on our freedom, and partly because we have always insisted that Egypt should follow an independent policy." Last August an arms deal between the U.S. and Egypt actually got to the stage of listing items required, but lapsed when Egypt failed to produce the cash.

When they heard the news of Nasser's decision to deal with the Communist bloc Secretary of State Dulles and British Foreign Secretary Macmillan, meeting in New York, issued a joint communique stating that their governments had acted "to avoid an arms race," and hoping that "other governments will continue to be guided by the same principles." Added Macmillan: "A heavy responsibility will lie with any country that introduces any new and disturbing factor into the delicate Middle East situation." Dulles sent Assistant Secretary of State for Near Eastern Affairs George V. Allen on a flying trip to Cairo to try to dissuade Nasser from making the deal. In Israel an emergency session of the Knesset was called. Said the afternoon Ma 'ariv: "We have warned U.S. officials a thousand times that Western attempts to woo the Arabs would lead to the West being blackmailed by the Arabs.

RUSSIA'S SOLOD & EGYPT'S NASSER Oranges aplenty

But the Communists were responding viet Ambassador Daniel Solod, credited with having masterminded the Czech arms deal, held a long session with Nasser, Asked by a reporter if he thought the West had any right to object to the Czech arms deal, he snapped: "What right?" Solid bassador Khalil Takieddine, thus giving credence to a rumor that Russia was preparing to extend her arms offer to other Arab countries, Said Arab League Secretary Ahmad Shukairy: "I don't see any difference between oranges and ammunition. Oranges are purchased where the price is right and where the taste is best. When it came time to see the U.S.'s Allen. Nasser first kept him waiting an

parently gave him little satisfaction. At week's end, addressing a graduating class of cadets at the Cairo Military Academy the 37-year-old Premier showed every sign of going ahead with the Czech deal poured scorn on the Western powers for their objections. "Their anecdote about the balance of power is a trick to fool world opinion." said Nasser, Stolen French and British intelligence documents. he said, showed that the Israeli army had been heavily armed by the Allies and was planning to attack Egypt. "But now." he said, "we are rich with faith, sacrifice men and arms. We shall proceed forward."

CYPRUS

End of Umbrellaism

In August 1915. Lieut. John Harding led a platoon against the Turks at Gallipoli, where British forces, too little and too late, were defeated. This week Harding, now a field marshal and retiring chief of the Imperial General Staff, returned to the eastern Mediterranean to repair the damage done in Cyprus by too little diplomacy too late. Sir John's appointment as governor of Cyprus, the headquarters of Britain's Middle East armed forces, was notice that Britain meant to crack down on violence stirred up in the name of enosis (union) with Greece.

"Fighting John" Harding, as tough in action as he is amiable in appearance helped Montgomery chase Rommel across North Africa, helped Alexander take Italy more recently presided in London over Britain's crackdown on the Communists in Malaya and the Mau Mau in Kenya. That a soldier of his rank and record should be dispatched to little Cyprus alarmed some Greeks and aroused many to anger. The official Radio Athens, reflecting the continuing Greek irritation over the U.S. vote against U.N. debate of the Cyprus matter reacted with an anti-American twist: "For every Cypriot | Harding | kills or imprions, free Greece will hold neither Eden nor Harding responsible, but Mr. Dulles. unless he repents at the last minute and stays the hand of Harding," Greek Foreign Minister Stephanos Stephanopoulos charged that Britain had "declared war on the people of Cyprus.

Troublemakers, It was not Harding who fired first, however, but Greek Orthodox Archbishop Myriarthefs Makarios, spiritual leader of the island's 410,000 Greek Cypriots and temporal leader of the enosis movement. Makarios ordered a 'systematic campaign of passive resistance aimed at achieving national freedom.

Besides the grave, soft-spoken archbishop and his church are two other groups more openly committed to violence in support of enosis-an underground terrorist gang called E.O.K.A. and the Cyprus Communist Party, whose 18,000-member Pancypriot Labor Federation has a hammer lock on the island's labor force, and whose membership includes the mayors of the second, third and fourth largest towns on the island. Communists obviously espouse the cause for troublemaking reasons Continued on Page 36

BLITZ NIGHT IN ISTANBUL

N the four weeks since an inflamed Turkish mob swept through Istanbul, venting its wrath over the campaign to swallow up the Turkish minority on Cyprus in union with Greece, ironclad censorship has kept the full story from the outside world. But by last week enough accounts had filtered out to justify the worst accounts of that terrible night. As these pictures show. Greek churches. tombs and sacred ossuaries were rifled and wrecked, as well as the stores along the famed Avenue of Independence. A sea of olive oil flooded the streets before one large grocery store; spilled paints and dyes made the street a nightmarish rainbow priest was burned alive in his bed, another scalped. By next morning, Istanbul was quiet again, its rubble-strewn streets the property of prowling cats and patrolling soldiers, but a reporter from London, who was there to see, compared the debris to the worst in England during Hitler's blitz.

alone, for if Cyprus really did fall to Greece, the Reds would be outlawed, just as they now are in Greece. In London last week, the Colonial Office charged Makarios with "enlisting Communist support." but the archbishop disavowed Communist or terrorist associations, suavely insisted that be opposed all violence.

Moin Phose to Come. Violence there was, however, eithough nothing like the havoc-wreaking anti-Greek violence in Turkey last month (are Naws IN PICTURES). On the day that Sir John's predessor, Sir Robert Armitage, boarded ship for a new post (governor of Nyasalind). Angry crowds gathered at the deciside as Armitage murmured to an aide his last words on Cyprios soil ("I do hope George words on Cyprios soil ("I do hope George

Responding to Sihanouk's invitation, thousands of sarone, Ind Cambodian Smiths and Mrs. Smiths thronged into the city to participate in a national congress to suggest constitutional amendment and nominate a Premier. All an adult citizen needed to do to be a "congressma" soll to present a coronut, a grapefruit, or some condition of the condition

Too Much Fruit. At the royal palace, his fingerlips pressed together in the customary seraphic greeting. Sihanouk played benign host, introducing the visitors to his royal parents and apologizing for not feeding them all: "You are so many, I would be broke." From his gilded, red velvet throne. King Suramarit received his gifts

nouncing the throne. Sihanouk had vowed not to return to high office, "I didn't walk out of my throne to climb into a Premier's armchair," said he, insisting that the "congress" choose someone else.

"On a little piece of paper you write down the name of your candidate." Sihanouk explained. "You give me the little papers. I give them to the King, my father, and papa makes his choice. Very simple, isn't i?" The people found it so, and in the end they asked papa to might Silanouk Premier. Next morning they for the paper of the silanous premier. Next morning they for of the Silver Papeda and trudged homeward.

For three days the young Prince resisted the temptation and then, with no other national leaders in sight, gave in. Announced the Royal Palace: "At the people's reguest, [Prince] Upayuvareach Norodom Sihanouk agrees to [head] the new government."

INDONESIA Voice of the Kamponas

At dawn one day last week, the people of the Javanese kampong, (village) of Tjidjantung began assembling in impassive silence to vote in Indonesia's first national election. Like some 43 million others across the island republic. Tjidjantung's 658 voters were mostly illiterate, indifferent to the issues, but they were plainly conscious of a momentous event.

Nimbly crossing a stream on a log wommouth by countless hare feet, a mass of moving color in their freshly laundered sarongs, they gathered before the thatched home of the village luxuh (leader) to hear an election official explain the proceedings, and the control of the color of the with naked, seekling habits. Workers buy or sells votes will be prosecuted . . . Do you understand?" The crowd murumed. "Yes,

yes.' Next, while the voters pressed close to the porch rail to watch, the official ceremoniously counted the blank ballots. Then he picked up the varnished wooden ballot box, held it aloft like a magician doing a trick, "Is it empty?" he asked, "Empty, empty," came the chorused re-"There is no cheating?" "No cheating," chanted the voters, "no cheating." Sharp at 8 a.m., the official called the name of the first voter, a wizened, crippled man of 95. He limped to the palm-leaf voting booth, spread the ballot over a sandbag, hesitated for several minutes, then carefully punched a nail through the symbol of his chosen party.

As the voting dragged on, a blistering sun turned the kampong into a steam bath, but nobody left. Even after the polls closed, the wilted voters waited to watch the counting by kerosene lamp. This was typical of polling places everywhere—intense, inarticulate interest, no disorders of any sort.

Conclusive results were not likely for several days. But at week's end, with about a third of the vote counted, it

remembered my umbrella") and departed.
The smaller, non-Communist Cyprus Confederation of Workers joined the Communist union and paralyzed the sidna with a troops in Limassol and tried to mass in Nicosia's square, but the Tommies and police fixed bayonets, swung clubs, fired tear gas, arrested 200 demonstrators, and generally let it be known that with the error of telerance when the confederation of the c

Vowed Archbishop Makarios in return: "The main phase of the struggle will be fought here on the island."

CAMBODIA

Papa's Choice

Prince Norodom Sihanouk, Cambodia's retired King and present popular idol, once dreamed of going to Hollywood to be a "Cambodian Charlie Chan." Last week, in Cambodia's capital city of Pnompenh (pop. 150,000), the young (32) leader produced directed and starred in a far more ambitious production, a sort of oriental Mr. Smith Goes to Washinston.

with regal gratitude: "Oh, the beautiful fruit." Concurred his son: "It's really too much. too much."

Then, as Sihanouk's articulate voice blared greetings from loudspeakers on pagoda rooftops, platoons of "congressmen." their credentials in order, congregated around the palace's ballet theater. The meeting was more in the nature of a mass rally than a formal legislative conclave, but Sihanouk, whose party had swept the last election (TIME, Sept. 26), thought it the best way to let his countrymen suggest laws and reforms. The crowd approved several constitutional changes proposed by the ex-King. One severed Cambodia's last legal bond of allegiance to France by striking from the constitution the words "Cambodia is part of the French Union." "An independent country doesn't have to mention in her constitution the alliance she is free to enter or quit," Sihanouk said. Unanimously the multitude agreed and turned to the stickier problem of choosing a Premier.

Too Many Chairs. Rising to his feet, a politician shouted: "We all agree: the Prince runs the government." But after re-

These Rubber Firemen Outwork Iron 3 to 1

Werning problem at a large Eastern power plant was the cast iron pipe through which hundreds of tons of call daily dropped from roof-top hoppers to pulverizers. The surprisingly abrasive coal chewed through the heavy pipe in a few short months. Added trouble came from frozer coal which sometimes clogged the lines.

Seeking an answer to the frequent, slow, costly replacement of pipe, engineers turned to the G.T.M.—Goodvean Technical Man—who specified Drynstorper-rugged, hand-built, rubber pipe. These flexible, steel-muscled "rubber fremen" greatly simplify installation, permit rapid rotation to distribute wear, even absorb selegel-hammer beatings to loosen clogged coal and serve over three times as long as the iron pipe.

Handling problems you may have is a specialty of the G.T.M. He can quickly show you how dry materials, or practically anything pumpable, can be better moved at lower cost with one of the over 800 types of hose he has in actual production or the many more under development. Consult him through your Goodvear Distributor or write Goodvear, Industrial Products Division. Altern 16, Ohio.

YOUR GOODYEAR DISTRIBUTOR can quickly supply von with Hose, Flat Belts, 1-Belts, Packing or Rolls, Look for him in the vellow pages of vont Telephone Directory under "Rubber Products" or "Rubber Goods.

INDIA

Fadeout

Seth Ramkrishna Dalmia is the kind of man who has made capitalist a nasty word in India. Dalmia said as much himself a few years ago. "I feel that from the age of twelve to these 57 years of my life, I have been accumulating the sins of wealth and palaces. I feel as if I had sucked the blood of the poor in establishing the big name of Dalmia.

At the time, Dalmia was pledging his life to the service of the poor. He could afford to. For this skinny little man with a split-melon smile had amassed an empire which controlled one-sixth of all Indian industry, ranged from banks to coal mines, insurance companies to newspaper chains. Son of rich parents who had lost their money, he says he made his first killing before he was 19 by cornering the Bombay gold bullion market. By 1937 he had made and lost three fortunes in speculations and won a hold on a cement factory, the foundation of an industrial empire that burgeoned mightily during the war. "During the war years, I earned money through sinful ways," he confessed

No World War. Dalmia was never too busy to scour India for pretty women who might give him a son. Sometimes he married them, sometimes not. He admired Hitler, hung pictures of him on his walls, and insisted that if Britain had sent him to Munich instead of Chamberlain, there would have been no world war. Indian politics did not interest him. Instead, he crusaded for One World, which he claimed to have conceived before Willkie, came to the U.S. to lecture on world government. He also gave a lot of thought to the cow, "Mankind cannot exist without the abolition of cow slaughter," he proclaimed and founded the Cow Protection League.

After the war, a change came over Soth Dalmia. He devoted more and more time to public confession and philianthropic works. Most-shotable gift was to the Gandhi Memorial Fund, a gesture, he damitted publicly, that was made not from philanthropic impulse but because he expected it to help him with the government; he was being investigated at the moment for warring tax evasion.

He hired a private guru and wrote uplifting moral tracts for his newspapers extolling the simple virtues—while maintaining more sumptuously furnished houses than he could remember, and requiring one of his four wives to cook everything he ate and to massage him with oil every morning. For the Indian Whôst Who he provided his own modest biography: "In spite of having monumental achievements, Dalmia views them with a sense of detachment, always realising thathe is not the doer of what he has done, but that in him God has fulfilled himself."

Two Gold Idoks. Despite his philanthropic precautions. Dalmin's warrime tax evasion cost him a reported \$2,000,000 in settlement. The government suspected worse but could not readily prove it, because Indian financiers notoriously keep three sets of books—one for the tax inspectors, one for their partners, one for spectors, one for their partners, one for seconded on Dalmia's offices and house and seized all the records they could find.

CAPITALIST DALMIA
How now, friend of the cow?

It took months to analyze them. Last week, on orders from Nehru himself, a squad of policemen swept up to Dalminis white-pillared house in New Delhi. Dalminis, clutching two small gold idols, was sounded to the piercing wails of his wives. The charge against one of the world's richest men: embeadement of \$4,100,000-worth of government bonds from his own blant? Insurance Co., keystone of his

In-court, Dalmia confidently-offered bail "in any quantity," But even he was staggered when the magistrate demanded \$5,000,000 cala and \$4,000,000 in surrebuting up \$5,000,000 himself, plut anbute \$1,000,000 in surreies offered by two relatives. As Dalmia went home. Premer Nehru held a press conference to discuss the progress of India's socialism. thing," he remarked cheerily.—a good thing," he remarked cheerily.

GREAT BRITAIN

Sacked Hero

Air Chief Marshal Sir Basil Embry is a pugnacious and uncompromising airman with a fine World War II battle record and a reputation for talking out of school. Last week at 53, Britain's most famous flying brasshat was placed on the retired list. No "appropriate appointment" available, said the R.A.F. "I am being . . . sacked." Sir Basil corrected, "I have strong views." The most recent Embry views: the R.A.F. is unready for atomic war. dominated by the civil service, shackled to outdated strategy and outmoded jet types by pound-pinchers at Her Maiesty's Treasury. Like his good friend General Curtis LeMay, chief of the U.S. Strategic Air Command and another battle-tested brasshat. Embry thinks that the next war will turn on the air forces' capacity to deliver immediate and lethal retaliation. The R.A.F., he says, can never attain A-combat readiness unless men with broad operational flying experience take over, put the bureaucrats in their place, and restore the service to its World War II standing as Britain's prime striking force.

Sir Basil, who wears a D.F.C., A.F.C. and four D.S.O.s. is popular with flyers as a leader who would fly anything they could. Promoted to a big command early in World War II, he led his Blenheim bombers on one more mission, was shot down over France. He slipped away from the Germans three times, once killing three captors with a knife and the butt of a sentry's rifle, another time impersonating an Irish Republican Army man (and spouting Urdu when asked to show that he could speak Gaelic). He slept one night in an absent German general's bed. watched from the bedroom window the Nazis' parade into Paris, and cycled across France to freedom. Back in Britain, he left his commander's desk and flew repeated fighter missions as "Wing Commander Smith.

As postwar chief of fighter command and NATO commander of air forces on the Central European front, he made promotion of more combat veterans to operational commands. But he also made enemies in the ministries by his criticism of the R.A.F.'s condition, and this year of the R.A.F.'s condition, and this year of the R.A.F.'s condition, and this year the command of the R.A.F. and the service of the service of the R.A.F. and the service of the service of the R.A.F. and the service of t

approval a statement carefully prepared by the Lord Chancellor announcing Princess Margaret's engagement to Peter

Only a few of the topmost government officials know the precise content of the statement. Even the press last week remained officially unaware of it, for in royal-family matters, the responsible British press acts much like a faithful family retainer-protective, discreet, and only affectionately chiding. But for more than two years, while palace and government have maintained an icy silence. Britain's press has aligned itself solidly in favor of the royal romance. Without affronting palace privacy, it has done its best to keep the public up-to-date on each new development in the case. When Townsend was in England this summer, the papers duly reported his frequent visits to the houses of those close to the royal family. proving he still stood high in the royal favor. Last week the newspapers went so far as to hint that the Queen and her Prime Minister were discussing the problem.

Beyond such hints, however, the discreet press cannot and will not go until given leave by the palace itself, a signal now expected in mid-October, when the royal family returns from Scotland and the announcement comes out of Eden's pocket for the public to read.

GERMANY

Big Small Power

"But we are only a small power." Germany's Chancellor Konrad Adenauer protested to Russia's Premier Nikolai Bulganin during his recent visit to Moscow. Bulganin shook his head gravely, "No. no," he said, "you are a big power, whether you like it or not.

Last week an official West German report to the Organization for European Economic Cooperation (OEEC) demonstrated in part what Bulganin meant. On the basis of present trends. West Germany expects its gross national product to be 10% higher this year than last. West German industry will produce about 15% more, exports will be up by \$880 million. total foreign trade by 20%. As a result. tax yields will increase 5%, enough to allow the government to plan reductions not only in consumer taxes but also in person-

Old Crimes

The young captain on the bridge of Kaiser Wilhelm II's yacht Hohenzollern had ambitions to match those of his master: both wanted to bust the bully-bold British Navy, In World War I Hamburgborn Erich Raeder, promoted to chief of staff in the Kaiser's brand-new cruiser squadrons, had a brief taste of glory in the battles of Doggerbank and Jutland (in which the British were powerfully mauled), but at war's end the barnacled fleet had to scuttle itself to avoid capture. Returning from Versailles. Raeder said: "Just wait 25 years. We'll be back." In half that time Raeder was building pocket battleships for Hitler, who made him an

CIPAND ADMIRAL PARDED The difference between smart and dumb

norary member of the Nazi Party, But in World War II, when his battleships proved no more decisive than those of the Kaiser, Hitler fired him, made submarinewarring Karl Doenitz grand admiral of the German fleet. Following Hitler's defeat. Raeder was tried as a top war criminal, sentenced to life imprisonment, Said proud. glory-loving Raeder in a special plea to the Allied Control Council: "I prefer a soldierly death sentence to languishing in prison

Last week, after languishing in Berlin's Spandau jail for nine years. Erich Raeder, 79. and suffering from hardening of the arteries, was set free on a clemency order signed by the four Allied powers. Wearing the same dark blue serge suit he had worn when the Russians captured him in 1945. high-buttoned shoes, grey suede gloves and blue-patterned tie, he drove off to see friends, and to receive the congratulations of the German Navy Association. Asked if he had any political plans for the future. Raeder said with a huff and a grin: "For God's sake, no! That is the very last thing

Raeder was released at the request of the West German government, which wants to give its new army a clean start by removing the war crimes onus from men whom most Germans generally considered to have been upright soldiers. Raeder's claim to this distinction could not be shared by the five top war criminals he left behind him in Spandau; onetime Deputy Führer Rudolf Hess. Hitler Youth Leader Baldur von Schirach. Munitions-Maker Albert Speer, former Reichsbank President Walther Funk and Doenitz. But in other prisons under British. French and U.S. control, there are still 104 lesser war criminals whose status is now likely to come under review.

The war crimes system was made to seem particularly unjust in German eyes

They all <u>look</u> like angels

but many an experienced mother has been fooled by a white collar and an angelic eye.

And when it comes to buying fluorescent lamps, you're up against a proposition just as tough. Because even an electrical engineer can't see down into the heart of a fluorescent just by looking at it. He can't tell you definitely which ones will burn on and on and on with a fine bright light—and which will dim out in the prime of their youth.

Now—Sylvania has taken all the guesswork out of buying fluorescents. For this simple reason:

We'll buy back, at the price you paid, any Sylvania® fluorescent lamps that do not, in your opinion, outperform any other fluorescent lamps you're using, on the basis of uniformity of performance and appearance, maintained brightness and life.

Please notice, this makes you the judge. And this money-back offer is good whether you buy ten lampsor ten thousand. Why not call your Sylvania supplier today, and order some Sylvania fluorescents with the "money-back" certificate. You guessed it—see're not taking any chances either. We never stop working on improvements to keep Sylvania fluorescents ahead of competition. And we prose the Sylvania fluorescent lamps against other brands in a constant, year-in, year-out light test-burning them night and day! We're taking no chances—and neither are you, when you buy from Sylvania.

ALLEN-EDMONDS, BELGIUM, WISCONSIN

last week by the climax of the case of notorious Nazi War Propagandist Werner Onetime righthand man to Goebbels. Naumann went underground in 1945 and stayed there through the bitter de-Nazification period, emerging only when new laws enabled him to escape being labeled a major offender. An unrepenting Hitlerite, he was soon active in neo-Nazi circles. Arrested by the British in 1953 for "endangering the occupation. he was deprived of the right to make public speeches, write for the press, broadcast or hold public office. But the transfer of sovereignty to the West German government invalidated the case against Naumann. Notified of this, unregenerate Nazi Naumann returned to active politics last week, an example to all Germans of the difference between the smart and the dumb

SOUTH AFRICA A Way with Transgressors

Simultaneously in more than a dozen South African cities one morning last week, teams of detectives began knocking on doors. Flourishing search warrants. they brushed past householders to search interiors. At the home of a white teacher of Johannesburg's Central Indian High School, they confiscated an old Chinese figured-silk dressing gown. Muttered one detective: "You never know what these symbols mean. Better have them translated." At St. Peter's Priory, they interrupted Anglican Missionary Trevor Huddleston in the middle of a Scripture lesson and expropriated 44 documents. The prize loot: Father Huddleston's correspondence with South African Author Alan (Crv the Beloved Country) Paton.

Altogether the dragnet stretched over three days, reached into the homes and offices of some 350 South African citizens. as well as headquarters of some 50 organizations. Although the raids were made under the Suppression of Communism Act, their real purpose was betrayed by the identities of the searched. The majority, like Father Huddleston, were simply open and avowed opponents of Prime Minister Strydom's apartheid policy. which seeks to establish absolute white supremacy in a country where whites are outnumbered four to one. Although the police committed many of the stupidities made familiar in other mass raids (seizfed from private libraries as possible evidence: Negley Farson's The Way of a Transgressor; Dostoevsky's Crime and Punishment), they were able to seize the records of some 50 opposition organizations and groups, some of which are pro-Communist, For all the police fanfare, no big Communist plot to overthrow the government was revealed. Some of the evidence did show, however, that many non-whites, deprived of moderate leadership by constant government harassment and restrictive laws, were turning more and more to extremism. At the Indian Congress headquarters in the Transvaal, a huge portrait of Red China's Mao Tse-tung greeted the police.

Best course to all EUROPE ... SAS Royal Viking

This is chef Viggo Hansen. Of the old European school that regards dining as a noble pleasure in life, he creates dishes for Royal Viking flights transatlantic between New York and Europe, and over the polar route from California direct to the Continent.

Seven leisurely dinner courses, plus breakfast and luncheon and cocktail hour hors d'œuvres and supper snacks emerge in triumph from galleys aloft tended by flight chefs trained by master chef Viggo Hansen. Accompanying wines bring a knowing nod from connoisseurs

... and open admiration from others. Yet such magnificence is only one reason why S-A-S is the choice of experienced travelers. S-A-S serves more cities in Europe than any other transatlantic airline. And the S-A-S Extraatlantic airline. And the S-A-S ExtraCity plan enables you to visit extra cities including London and Paris — at no added fare! Write S-A-S for Extra-City brochure, EX-2, or see your travel agent.

Canadian Pacific presents the luxurious new

EMPRESS OF BRITAIN

The newest, streamlined member of the White Empress fleet sails from Montreal early May 1956. Now is the time to make plans for your voyage to Europe via the historic "Landscape Route."

Canadian Pacific scores again!

Now the world's largest travel system with a half century of experience on the St. Lawrence River route—adds another symbol of service to an ever-expanding Canada.

The Empress of Britain, newest of the world-famous fleet of White Empresses, with its 26,000 tons of functional beauty offers you scores of luxury liner features ...provides you with the comfortable spaciousness and gracious service that seasoned travelers have long identified with White Empresses.

Aboard the Empress of Britain you'll

find individually controlled air conditioning for every public room and stateroom. First class or tourist, you'll enjoy the cinema, dancing, libraries, shops, cocktail lounges and many other facilities offered

for ocean-going recreation and relaxation. Be among the many to share the thrill of sailing the historic "Landscape Route" down the St. Lawrence to Europe. Enjoy a third less ocean travel, one thousand sheltered miles of romantic river scenery.

Book passage from Montreal aboard the new Empress of Britain today. Tourist and first class accommodations. See your local agent or Canadian Pacific in principal U. S. and Canadian cities.

THE HEMISPHERE

ARGENTINA

Clean Sweep

Working twelve hours a day, Argentina's new President Eduardo Lonardi last week set about the orderly launching of his own administration and dismantling of the police-state trappings and symbolism of the discredited Peron regime.

An "eternal flame" that burned in memory of Exa Perion on an outside wall of the Congress, building was snuffed out. A naxy cruiser was sent to Uruguny to bring back 450 anti-Peronista exiles. Universities, whose staffs Perofi loaded with subservient hacks, were de-Peronized as fast as possible. The new President, a churchgoing Roman Catholic, restored to exclude the Perio.

In his handling of organized labor-the one area where Perón had a solid base of political support-Lonardi moved with caution and conciliation. Instead of using his state-of-siege power to "intervene. i.e., take over, the powerful General Confederation of Labor (C.G.T.), he announced his confidence that labor could purge its own ranks without government compulsion. The new President also stepped adroitly around the vexed question of La Prensa, the great newspaper that Perón confiscated and turned over to the C.G.T. with an elaborate show of legality. Lonardi explained that he would not hand the paper back to its original owners by arbitrary decree-which left the way open for the de-Peronized courts to settle the matter in good time.

A career soldier. Lonardi naturally leaned heavily on old and trusted friends for his administrative appointments. He made a clean sweep of scores of Peronista governors and mayors: so many senior military men were called on for temporary military men were called an administrative manufacture. He calment from the company of the compan

BETTER THINGS FOR BITTER UVING

PEOPLE

Names make news. Last week these names made this news:

Republican Ellen Borden Stevenson, ex-wife of the Democrats' Standard Bearer Adlai Stevenson, hit her low boiling point in Chicago upon learning that burglars had ransacked her country house in Libertyville. Among the stolen items: a big polar-bear skin, stationery, a 300-lb. safe (empty). A couple of days later the phantoms struck again, but took nothing. Next night somebody tried to pry open the trunk of Ellen's car, parked in the estate's driveway. Now infuriated to the vaporization point, Mrs. Stevenson fired off to local newspapers a press release that conjured up a vision of a pioneer woman patroling her homestead veranda with a shootin' iron. Her unsentimental sentiments: "Effective immediately, any person found trespassing on the premises after dark will be given one warning to halt . . . If this is not heeded, he will be shot without further notice."

In England's castle-flecked County Durham, U.S. Ambassador to Britain Winthrop W. Aldrich, cheered on by an elite audience of British and American brass. officially opened newly restored Washington Old Hall, 800-year-old home of the ancestors of George Washington. He was suddenly confronted by a prim, greyhaired gatecrasher. The uninvited guest: Cary Lady Schuster, 88, widow of a titled physics professor. Her ticket of admission; a lineage chart showing her direct descent from John Washington, the first President's great-grandfather, who sailed to America in 1657. Offering a glad hand, Ambassador Aldrich glowed: "A Washington? Welcome home!

Forging his way across the wilds of Washington, D.C., intrepid Rear Admiral (ret.) Richard Evelyn Byrd, 66. who always reached his goal in his dashes to the North and South Poles, showed up at the local Columbia Broadcasting System offices and proclaimed his readiness to record an interview about "Operation Deepfreeze," his new Navy expedition to Antarctica, due to get under way next month, CBS welcomed him warmly, invited the admiral to cool his heels while it explored its program schedules. Half an hour later, it developed that the famed explorer had missed his bearings. Near by, the Mutual Broadcasting Co. was preparing to send out a search party for him. As he altered course. Admiral Byrd confessed: "I'm embarrassed."

Two of show business' most durable headliners. Musicomediener, Morry Morrin and Britain's Playwright-Actor-Composer Noel Coward's home on the West Indian island of Jamaica to rehearse for a television Spectacular. On a Ford Start Jubilee program (CBS-TV. 9:30 p.m. E.D.T., Oct. 22), Mary will nostalgically warble

TV STARS MARTIN & COWARD Two for the show.

tunes from her past hit musicals, be spelled by Coward, in his TV debut, husking some of his own melodic wit.

Leo Durocher, erstwhile brass-lunged manager of the New York Giants (Thm. Oct. 3), after only a few carefree days of unemployment, strolled into the National Broadcasting Co.'s Manhattan suites, casually signed a one-year contract with NBC at a reported salary of \$\$2,200. The Lip's sprawling new duties, merited by what the

TALENT SCOUT DUROCHER
One for the money.

network called his "great executive ability": talent (undefined) scouting, sports commentaries, assorted guest appearances, gadding about as NBC's super-articulate good-will ambassador.

Two of the U.S. Senate's appress Democrats got act to observe hisheseniority birthdays without fuss this week. Ariaona's bland Carl Haydon, about to turn '8, in Congress ever since Arizona achieved statehood in 1912 (a record for present members of Congress), was bustling about his state's 44 counties. first-amming his devoutly loyal constituents and shaking devoutly loyal constituents and shaking their horny hands. His colleague. Rhode their horny hands. His colleague. Rhode their horn hands his colleague. Rhode and their hands have his state's 44 counties. First-aming his devoutle for the state of the state

After winging in to Fredericton. New Brunswick, Britain's Ontario-born Publisher Lord Beaverbrook, 76: discoursed balefully about ad-jammed U.S. newspapers: "Some U.S. publishers are sitting on a keg of dynamite. If advertising falls off, [they] will be in the red."

When Pakistani officials passed the word that their new Ambassador to the U.S., former Premier Mohammed Ali, 46. would bring only his recent bride, Begum No. 2. Aliya Saadi, 30, to Washington (TIME. Sept. 5), the capital's hostesses and the striped-pants set puffed relieved sighs. If Ali, diplomatically immune to federal antipolygamy statutes, had chosen also to bring along Begum No. 1, Hamida, 40. Washington's social functioneers would scarcely have known whom to begum. Horrendous was the prospect of issuing invitations to the Pakistani Ambassador and the Mesdames Mohammed Ali. Last week, however, with Ali and No. 2 (his ex-secretary) already ensconced in the capital. Washington's protocolists had reason to hold their breaths again. Trotting down a liner's gangplank onto a Manhattan pier came none other than Hamida, With her were Ali's sons, Hammad, 17. and Hamde, 15. Hastening to head off a protocalamity, the Pakistani embassy announced that Hamida would sit tight in New York, leave the Washington whirl wide open to Aliya. But young Hammad, stalked by newsmen as he struggled to disembark with his tennis rackets. cricket bats and 47 pieces of family luggage, quickly unsettled the embassy's assurances. Murmured he testily: "I don't know where we are going.

SALT SPRAY

Salt is both friend and foe . . . vital to life itself, endlessly useful to industry . . . yet a releutless catalyst of corrosion on metal, rot in wood. In formulating finishes for industrial use, we challenge salt spray to do its worst, so that we may learn how to do better for our enstoners. The Interchenical approach to chemical coatings problems is a technical attack, based on continuing research, proven in practice in many industries over many years. If your product requires a surface coating for protection, decoration or communication, we offer authority and world-wise experience.

Interchemical laboratories use the Salt Fog Test Cab net to measure the corroston resistance of metal finishes. Contedpanels are subjected to a dense "fog" of

Old Favorite in Manhattan

Mourice Chevalier, though 67 and thicker of waist, can be as debonair, as gamin, as bonlevardier as ever. He proves as partial partial provides as clever as partonime, as suavely deficient in voice; he flashes his professional yet always personal smile, brightly kids flamenco, travesties the English, bangs at Las Vegas.

Execution the cork pops and the hompsome flows, the drink often tastes pretty flat. A whole evening of Chevalier is debatable to begin with; a whole evening who who were so what and stick, he must in effect tote sample cases full of inferior wares, seems a real missake. At times Chevalier rises gaily above his material; at other times happily revers to Vlaetine or Louise. But what much of the time stands out is the effort to seem effortless.

New Plays in Manhattan

The Young and Beautiful (by Sally Benson). Laid in Chicago in 1915. this stage blend of Scott Fitzgerald stories concerns a teen-age beauty who seems, in her blasé posturings, an early Jazz-Age young thing. She yearns for the perfect love, and in the search for it no sooner conquers suitors than she brusquely casts them aside. At last she meets and wins the perfect lover (James Olson), but there follows neither romantic lightning nor satiric laughter. There is rather the chill discovery that even now she cannot respond, that the seeker of a grand passion is incapable of any passion, and all her swains have been burnt by lack of fire.

Whether altogether frigid or partly immature, ruthlessly self-centered Josephine Perry is interesting to watch in a play

Lois Smith & James Olson Burnt by lock of fire.

that begins like another romp about a junior miss up to junior miss lupt in the first, only to grow steadily more soher in tone. As Josephine. Lois Smith has the right kloks and essential right talent, but works with too few and too showy gestures. And the most support of the second of the secon

A Day by the Sao Iby N. C. Hunter) was a success in London, where the castinctuding Sir John Gielaud. Sir Ralph Richardson, Dame Sybil Thorndike and Irene Worth—was dazaline. On Broadway, where the cast is merely good, the play's chances seem slighter. A prettily draped Dorstthine study of has-beens and neser-weres. a Chekhov-disavored and neser-weres. a Chekhov-disavored and specific properties of the pr

The characters are so many musical instruments for a rather sophisticated but monotonously scored tone poem. There is a mother (Aline MacMahon) who is pleasantly, parochially country-housish; her once-vigorous brother-in-law who is now just terribly old: her overserious. not very human son (Hume Cronyn), a civil servant who has lost out on the girl who loved him and is losing out on a career. There is the girl herself (Jessica Tandy), now a middle-aging widow who loves him no longer. Devoid of pasts or futures or both, the characters are drowning with the utmost politeness; it is sometimes hard, in fact, to distinguish desperation in them from mere lassitude.

The play has its bubbles of English humor. As the half-dead old man. Halliswell Hobbes brings particular life to his part, and Dennis King is bright, if a little broad, as a bitter doctor. Most of the other characters are more broading in their cases, or coase to care, without much individually. Had there never been a Chekhov. A Day by the Sea might provide a rather velcome breath of fresh-airlessness. As it is, the effect seems both too faint and too familiar.

A View from the Bridge (by Arthur Miller) is a double bill—two long one-acters about life at opposite ends of the Brooklyn Bridge. The two are much farther apart in mood and merit than they are in locale. The Manhattan play. A Memory of Two Mondays, is a pat, shaper life than the properties of the p

A View from the Bridge concerns Eddie Carbone, a kindly longshoreman who has brought up his wife's orphan niece (Gloria Marlowe) with his own family. All goes well until he takes into his home two Sicilian cousins who have entered the

Martowe, Davatos & Hertin Not with shears, but a dagger.

U.S. illegally. The nice and one of the coulins (Richard Davalos)—— blond youth who likes to sing and cook—fall in love. Eddie's intense, unrealized sexual feeling for the niece drives him to jealous rancors. He taunts the girl that the boy seeks marriage only as a way of gaining citizenship; he threis to make the neighborhood think the boy is a homosexual. Still thwarted, he blash about the cousins and in a final range draws a knile in a fight that results in his own death.

With suggestions of ancient Greece in Boris Aronson's fine setting, with the neighborhood lawyer (J. Carrol Naish) acting as Greek chorus and talking poetically of the Greek and Sicilian past. A View plainly seeks to evoke the drama's great first home of guilty passion and fatal ignorance. But the play, in all this, only emphasizes how little its peasant psychology and hot Sicilian natures have in common with highborn Greek tragedy. Only now and then does there jut up the fated blundering of life, and the pity of it. Far oftener it seems no Furies' shears that slit. but the vendetta's dagger, not prideful man that falls, but tormented beast,

Though lacking sharpness. A View is for most of the way powerful and tense. Only near the end do things slacken, so that the play concludes with no great tragic impact. This may partly lie in Van Hellin, who, playing a character that Miller made more obsession than man, is wanting, for all his competence, in Italian nature and intensity.

More than good theater at its best, the play is not quite good drama as a whole. But it strongly bears Miller's signature, whereas A Memory of Two Mondays—making stage types of factory types, and naturalism an excuse for plotlessness—could be in almost anyone's handwriting.

Raoul Alfonso Gonsé: "Pearson saw only one side of the coin."

Columnist Perez. The hardest blow was struck by Columnist Milton Guss in the English-language Havana Post, which usually carries Pearson's column. Instead, Guss introduced readers to "Don Perez, famous Havana columnist, whose predictions are 98% correct—2°, of the time." Wrote Guss.

"Perez is an expert on North American dialris, having just returned from a comprehensive twelve-hour trip to Washington . . . Of course. Perez speaks no Engthorn the just made the assignment more at the part made the assignment into the part of the particle of the ling with the natives, fle visited the country club, had lunch with John D. Vanderfeller the owns the southern half of Maryland, and stayed at the penthouse the period of the penthouse of the penthouse of the Here then is ! (Americal as Perez sees i)!

"The first thing that impresses one about Washington is the lack of guayaberas [the loose-fitting Cuban shirt]. I failed to find even one in the U.S. And so my first prediction for today is: the guayabera will never catch on in Washington.

"'I was amazed to discover that when the natives drink milk, they do not flavor it with salt and sugar . . . I predict that the next North American newspaperman who writes an expert's opinion of Cuba will know less about Cuba than I know about the States.

Trials of the Trib

The long-ailing New York Herald Tribune, which has been busily expanding since brisk. 30-year-old Ogden ("Brownie") Reid stepped in as publisher last spring. had to pull in its belt this week. Five years after launching an 8 p.m. "Early Bird" edition in hopes of snaring readers from the Times (whose first edition does not hit the street until 10 p.m.), the Trib decided to drop it to save money. By pushing the first edition deadline back an hour. Brownie Reid also figures that staffers will have more time to fill out their stories, thus cut down makeover costs for later edition

Brownie Reid has other troubles besides the Early Bird. In his eagerness to sweep out the cobwebs from the paper (TIME. April 18), he has also swept out much of the paper's oldtime esprit de corps. "In the past year," said one Trib yeteran. "there has been complete unrest in the city room." The Trib has been losing many of its top staffers and promising younger newsmen. City Editor Fendall Yerxa quit. to be replaced (TIME, May 30) by hardboiled Luke Carroll, onetime Trib Chicago correspondent. Close to a dozen other staffers, including John ("Tex") O'Reilly. Trib nature columnist and former war correspondent, have also recently left. By far the biggest loss to the Trib will be felt later this month, when the news staff's brightest star. Correspondent Homer Bigart, 47, two-time (1946, 1951) Pulitzer Prizewinner, moves over to the New York Times. Bigart, who had never worked for any other paper in 27 years as a newsman. admitted that he had "sweated blood" over the decision. Said an old friend: "Homer's resigning in complete rebellion

A Matter of Standards. What is happening on the Trib? Many staffers feel gone all-out for circulation-with jazzedup news coverage and contests such as "Tangle Towns" (Time, Jan. 10) and its current "Bible Names"-at the expense of the paper's lofty, long-established editorial

against what's been happening.

standards. Brownie Reid is well aware that cityroom morale has sagged. "But I'm sure they'll feel better when they get used to things," he said last week, "You can't make changes without some griping going on. I hope they're starting to feel that it's a question of a winning team v. a

losing team If morale has taken a beating, the Trib has advanced on other fronts. Sports and financial coverage have been expanded Weekday editions have been dressed up

with an eye-catching, mint-green "third section" containing the features, sports and comies as part of a plan to compart, mentalize the news for easier reading. By relying more heavily on stories, e.g., last month's "wolf whittle" murder trial in Mississippi, the Trib have domery, expanded features and local news coverage.

Right Diet? Weekday circulation, stimulated in part by contests, has climbed steadily in the past year to an estimated adoo,ooo, up some 60,000 from last October. The Trib's new weekly TV and Radio Magazine is still losing money, but it has helped jack Sunday circulation to 600,000. Up 528.525 a year ago. And the Trib's advertising linage last week was running 10% abed of last year's leyel.

With the circulation and advertising gains. Browine Reid believes that his diet for the Trib is already proving its aways. Furthermore, the Herald Trib is already proving its aways. Furthermore, the Herald Trib is didate, which now has an alltime record total of 46 papers on its wire services and 835 mall customers, is making more money than ever before in its 31-year history. Said Reid last week: "We should stay in the black from now on."

New Look for the Satevepost

Not since 1942, when it dropped its sprawling, double-deck cover title, had the Saturday Evening Post (circ. 4,600,-000) made major changes in its makeup. But last week readers of the Satevepost saw a big difference. There were more pictures-some spread across two pages or running necklace-fashion around text. There were wider margins, gaps of white space, splashier illustrations, and a Collier's-like short-short story. As body type for its stories and articles, the Satevepost replaced its familiar Century Schoolbook type with a lighter version of an oldfashioned design by John Baskerville, great and good friend of Satevepost Patron Saint Benjamin Franklin

Resson for the change, and Editor Bethlibbs, was to give unbeychere "an easier to read, more beautiful magazier." Out thing else: to under a sale prompted by thing else: tougher competition. Though the Catesypacty circulation is edging up, and total advertising revenue increased \$1.072.053 in the first half of 1955, advertising pages through September, 1955 silipped 4.7% below last year.

Curtis had other problems. Its TV Program Week, launched as a competitor to thriving TV Guide, folded after eight issues, at a heavy loss to the company. According to trade gossip, Curtis' magazine, Bride-To-Be, first published in July, has been left waiting at the church, although Curtis Vice President Benjamin Allen said last week: "For a quarterly, it is going pretty well." Though Curtis lifted its gross 2% to \$90,650,000 for the first half of 1955, its net profit tumbled 33% to \$2,500,000. The drop, explained Curtis, was caused by heavier outlays for promotion, rising costs of production. and increased volume discounts to heavy advertisers. Curtis hopes that the changes will reverse the trend, send profits up.

CHAMPION Sets the

Forestry—an art and science is mastered by Champion to produce superior papers Here, in the rich pine forests, the production of Champion's quality papers begins. Millions of acres of pine—straight and sturdy—provide the pulp utilized in the papermaking process.

To insure proper growth, these trees are frequently thinned by trained foresters. Periodically, new seedlings are planted in open country to supplement the forests and perpetuate Champion's wood supply. Champion's well-planned, well-supervised forestry program typidies its leadership of the papermaking industry. Pace in Papermaking

A baby chick,

the new Royal electric and more work per typist

The baby chick weighs only about two ounces.

It takes less weight than that for a typist to depress one key on the new Royal Electric! And it takes only three ounces to push down the carriage return lever.

It's 13 times easier for her to do these jobs on the new Royal Electric than on a non-electric typewriter. This means more work per typist.

rypewriter. This means more work per typist.

Talk to your Royal Representative. He's in

the classified telephone directory. When he has the facts on your typists' salaries, days worked per year, hours typed per day, and increased production, you and he will be able to figure out the savings you may expect from installing new Royal Electrics.

Your typewriters are the only everyday business machines that aren't electrified.

Right there is food for money-saving thought.

EDUCATION

The Man Who Confessed

Most U.S. colleaes and universities have agreed that they do not want Communists on their faculties. Many have also decided that they do not want formone that they do not want for competent questions about themselves and the party. But what about the ex-Communist who has confessed all? Last week, having answered that question for itself. American University in Washing. the D.C. found thereof its different formone of the property of the proper

The case involved was that of Law Professor Herbert Fuchs.* When the university hired him in 1949, he gave no hint that there was anything amiss in his past. Then last June, he was subpoenaed by the House Un-American Activities Committee. After one appearance at which he declined to name his former associates. he decided to answer everything. He had he said, been a party member from 1934 until 1946, when he broke in "complete disillusionment." During that time, he had worked with a Senate committee investigating railroads, had had a job with the NLRB and then with the War Labor Board. At each of these places, he had been the head of a Communist cell.

When news of Fuchs's testimony first lenked out. AU: 5 President Hurst Andreson rushed to his defense. Fuchs, he declared, was 'an intelligent, loyal and declared, and the state in the past, which he has recognized and declared. The university, added Anderson, had every intention of keeping him on: "To take any other position at his control of the past of the past

[®] No kin to Britain's Physicist-Traitor Klaus Fuchs.

As Puchs's testimony continued, however. Anderson had serious second thoughts. Shocked by the extent of Puchs's involvement during twelve years of deceit. Anderson first asked him to take a leave of absence. After three months of consideration, he and his executive committee decided that Fuchs should be dropped from the faculty. Whatever merit A.U.'s decision might have had, it proved to be popular with almost no one.

Both the Chicago Tribmer and the international-mined Washington Post and Times. Herald denounced it. Ohio Consessional Gordon Scheere, a member of consessional Gordon Scheere, a member of start to fire men who cooperate with the committee can only . . . stop others from cooperating." Said Herbert Fuchs: "My diminisal serves no useful purpose. It definitional for the consession and for publicity and can please no group in American life other than possibly the Communist Party."

North-Country Challenge

The reputation of the main speaker was known throughout the territory. It was no surprise to the University of Alaska's commencement audience last year that he should choose as his theme: "Be Bold. Ernest Newton Patty had been one of the original 1922 faculty at the struggling new campus. He had been dean of the college had built up the mining school into one of the best in North America. After 19 prosperous years as a Seattle mining engineer. he was back at his old school to urge more "bold planning in the years ahead to develop this university to the point where it is giving maximum service to Alaska." After he finished speaking, the university's regents decided that Patty was just the man to succeed retiring Presi-

Alaska has not regretted the regents decision. Last week, as the new school oyar began, the university announced that its enrollment had hit a record 300. A \$0.000.000 building program was under way, and the university's prestige had never been higher. In a terricipy's hopes-for the future—the producer, as Ernest Patty had said, of "courageous young men and women who will go out and accept the challenge of the north country."

Moose & Coribou. When Patty first went to the new campus, op miles south of the Arctic Circle, it hardly seemed the sort of place to accept any type of challenge, It was called the Alaska College of Agriculture and School of Mines. It had six professors, six students, one building. Moose and carbon wandered freely about, which was not to be a support of the control of the contro

Patty's school would make a name for itself. It was located near some of Alaska's biggest gold, coal and copper mines, and Patty and his students spent as much time were at first a rough lot. They got into so many tavern brush that President Bun-nell once exclaimed: "They'll be the ruination of us all." Patty replied: "Dun't worry, Dortor, You'll be proud of those boys some day." By the time he left to start his work of the patty of the pattern of the substitute of the pattern of t

Bison & Oxen. The fame of the school of mines soon spread to the whole institution. The university's 13-building campus is uniquely equipped to give special training. Its geologists have studied the chemistry of the arctic's soil and the effect of frost and thaw. Its Geophysical Institute has become a center for research into the upper atmosphere and the aurora. Last year some 30.000 visitors trooped through its museum to examine 100,000 Indian and Eskimo exhibits as well as the skeletons of the hairy mammoth, super bison, musk ox. Pleistocene horse and saber-toothed tiger. Meanwhile, the university has spread its influence far beyond its own borders. Last year 1,000 adults took its special nineweek mining course; 1,000 students are now enrolled at its branch community colleges in Anchorage and Ketchikan; 1,100 study at its military branches at Eielson. Ladd and Elmendorf air bases

President Patty hopes to have a third community college in Juneau. He has built a \$600,000 student union, will soon open a new domitory for married students, a new library, new research and the students and the students and the students have been students and the students have been students as every support of the students will be supported by the support of the students will be supported by the supported by the supported by the support of the supported by the

"BY LAND FROM THE U. STATES IN 1804 & 1805"

Minwether Demis & Almblack

PHOTOGRAPHS FOR TIME BY BRADLEY SMITH

THE most exciting travel drama in U.S. history began May 14, 18c4. On that rainy Monday President Thomas Jefferson's private secretary. Captain Meriwether Lewis. 29. 1st Regiment of Infantry, U.S.A., and his friend, 2nd Lieut. William Clark, 33, of the Corps of Artillerists (he signed himself captain on Jefferson's authority), headed westward from St. Louis at the head of a 13-man "Corps of Discovery, Their objective was to explore the newly acquired territory of the Louisiana Purchase and find a route from the Missouri to the Columbia River, over which the rich fur trade of the Northwest might be diverted from British Canada to the U.S. Eighteen months later-on Nov. 15, 1805-they reached the Pacific Ocean. This month Lewiston. Idaho, and cities of the Northwest in the valleys of the Clearwater. Snake and Columbia Rivers, are observing the 150th anniversary of the Lewis & Clark Expedition.

The Corps of Discovery was composed of hardy Kentucky hunters and frontienmen. French battmen and soldiers in leather collars with their hair in pigtails. Clark's Negro-servain. York, was along, and later they were joined by Sacajawca to the control of the cont

Crossing plains teeming with buffalo, and budlands and canyon filled with antelope, deer and elk, they reached the trapper's leendary. Roche Jaune River (Veillousstones: Then came the Mills, the plaint, swhich Clark named for his future wife. Wed," though "the hue of the waters... but illy comport with the pure cleetal virtues and anniable qualifications of that lovely fair one." At night on the plains, the ground around them shook from the stomping herds of buffallo, and once a buffallo shook from the stomping herds of buffallo, and once a buffallo

Lewis and Clark departed, May 1804

THE GATES OF THE MOUNTAINS The Missouri River near Helena, Montana

"Much the most remarkable cliffs that we have set seen. The Males of this destruct a spot except one of a few-yards in extent on root appears to have forced its way through this immense body of which is miss could cest the solid table foot. From the snaping appears to have forced its way through this immense body of which is many could cook for the definition of 15°, Mills., so not that in the 1st personal to the place table that depends of the rocks mountained of the place table that depends of the rocks mountained.

THE UNEXPLORED LAND
The Missouri Canyon near the Judith River, Montana

"While I viewed these mountains I felt a secret pleasure in finding myself so near the head of the heretofore conceived boundless Missouri; but when I reflected on the difficulties which this . . . Surrier would most probably throw in my way to the Pacific, and the sufferings and

hardships of myself and party in thim, it in some measure counterballanced the joy I had felt in the first moments in which I gazed on them: but as I have always held it a crime to anticipate evils I will believe it a good comfortable road until I am compelled to believe differently.

THE WHITE CLIFFS
East of Fort Benton, Montana

"The water in the course of time . . . has trickled down the soft sand clifts and woarn it into a thousand gro-tesque figures. . . purapets well tooked with saturary runs of eligant buildings . . . collismus standing and almost earlier . . . nitches and alcover of various forms . . . As we passed on it seemed as if those seems of visionary inchantinent would never have and end."

TOWER ROCK, MONTANA

Near the Dearborn River

"At this place there is a large rock of 400 feet high wich stands immediately in the gap which the missiouri makes on it's passage from the mountains... from it! I saw this evenining immence herds of buffaloe in the plains below, near this place we killed a lat clk on which we both dured and suped."

RAINBOW FALLS Great Falls, Montana

"I took my position on the top of some rocks... [and] viewed ... this truly mag nifficent and sublimely grand object, which has from the commencement of time been concealed from the view of civilized man."

SOURCE OF THE MISSOURI Montana-Idaho Border

"At the distance of 4 miles further the road took us to the most distant fountain of the waters of the Mighty Missours in surch of which we have spent so many toilsome days and wristless nights."

CAMAS FLATS Near Weippe, Idaho

"Our camp is agreeably situated in a point the quawmash is now in blume and from of timbered land on the eastern border of an extensive level and beautifull grane I could have swoarn it was water."

THE LOLO TRAIL

The Bitterroot Mountains, Idaho

"I find myself growing weak for the want of food and most of the men complain of a similar deficiency, and have fallen off very much, the general course of this day \$30W 15 Miles."

THE COLUMBIA RIVER

Mount Hood from West of Celilo Falls

"The river passes into the range of high Countrey . . . [it] rises here about 200 feet above the water and is bordered with black rugid rocks
... saw a mountain bearing S.W.
conocal form Covered with Snow."

THE PACIFIC OCEAN Near the Mouth of the Columbia River

"Creat joy in Camp we are in view of the Ocian . . this great Pacific Octean which we been so long anxious to ing on the rockey Shores . . . may be heard distictly."

ball bellowed into their camp and trampled two guns. The party was almost sunk by rapids and tormented by mosqui-toes, cloudhursts and rattlesmakes. Still in present-day Montana, they portaged around the Great Falls, studied animals that were strange to them; prairie does, ancietopic highorn sheep. Then they passed Mont; and the gase-old Indian war ground at the Three Forks of the Missoat

Near today's Montana-Idaho border, they followed the Jefferson River to what they thought (wongly) was, the source of the Missouri; one man stradfeld the little stream and "thanked his god that he had lived to bestrict the mighty & heretolore deemed endless Missouri." At Lemhi Pass in the Control of the Missouri and the Missouri and the piled them with horses and a guide.

To the Columbia. The guide took them on a long detour through the land of the Flatheads, who like other tribes found York the most interesting member of the expedition. Crossing the snowclad Bitterroot Mountains' Lolo Trail, they ran out of food in the wilderness, in desperation ate their horses to keep alive. Emerging on the western slope, in Idaho's Weippe Prairie, they gorged on camas bulbs (which made them sick) and dog meat ' (which they found surprisingly good). On the banks of the Clearwater River they built canoes and floated down the Clearwater and the Snake to the Columbia River near present-day Pasco, Wash, Harassed by squat, fish-eating Indians, who tried to steal their possessions, they navigated the Columbia's treacherous rapids and passed through the Cascades.

The climax came one day when the canoes were plowing through rain. for and high, rolling waves near the mouth of and high, rolling waves near the mouth of parted, and the men sighted the Pacific ("Of the joy," Clark noted 1, On the Oregon shore, they built a salt caise and win-tered. Clark cut his name on a pine tree gon shore they built a salt caise and win-tered. Clark cut his name on a pine tree back; "By Land from the U. States in 1804, "By Land from the U. States in 1804, and from the U. States in 1804, and the wine stand from the U. Hesding Home. In the spring, the expedition turned back, trying new routes. They had their horses stolen by Crows, age into a fabil with Blackete, and had was accidentally shot in the buttocks, On Sept. 2; 1866. grimy, bearded and bursting with marvelous tales of things no other white man had ever seen or no other white man had ever seen or by all the village and received a harty welcom from its inhabitants.

The expedition was a huge success. At a cost of about \$3.500. and with the loss of only one man (apparently from appendicitis, the first year out), it opened up the vast trans-Mississippi West to settlement and commerce, and established a firm basis for this nation's later claim to the Oregon country.

RELIGION

Last Train to Babylon

The saints of suburbia are the gocetters. Under their influence suburban church life has become so thriving, says, the Rev. Gibson Winter of Brighton, Mich, in the Christian Century, that it "has become the controlling force in American Christianity." What effect has this shift had on the church's spiritual message? Answers Episcopalian Winter. "Despite the strength it has produced, this has the church's spiritual message to the control of the church's witness to Christ's lordship." "Suburbia has introduced its concept of

success into the very center of church life
. . . The task of the churches as witnesses

. . . The task of the churches as witnesses to Christ's lordship . . . has been submerged . . . The test of every parish enter"The anti-Christian forces dominating the leadership introduced into the churches by the suburban capitally are offset the the suburban capitally are offset the capitally of the church is a national trage day of the first order, for it occurs at a time when America's position of world leadership requires a prophetic church at home. . . [It] may well be God's word of judgment upon us as his church. For our trespasses and complacency, we have been delivered to Balyslon."

11,011 Virgins

On the banks of the upper Rhine in the Swiss city of Basel, 400 schoolgirls named Ursula assembled one day last week to welcome home their patron saint. St. Ursula's diamond-studded gold and silver

BUST OF ST. URSULA & NAMESAKES IN BASEL It was a wonder to see.

prise is whether it will bring monetary and numerical progress. "The church's captivity to [suburbia]

is the death blow to recovery of the Biblical view of corporate life, corporate sin and corporate salvation . . . 'Salvation' and 'redemption' are disturbing to suburbia . . Whatever the reason, the Biblical faith is rarely met with in suburbia despite growing church membership and activity.'

American suburbs are growing so quicky, says Winter, and suburbanites are joining the churches so fast that there is no enought time to indoctrinate new members as Christians. "Despite a nominal church background, this is an unconverted, untrained mass of people who make the problem of church membership comparable to what it was in the time of Constainnated institution of Roman society. **.* Moreover, they and their clergy are too busy to stop to heart the Gospel. bust sailed royally up the river in a ceremonial barge, much as, centuries ago, the saint herself had sailed on her way to Rome with her 11.010 virgins.

Skeptical modern scholars suspect that this statistic represents a medieval copyist's error, and that there were only eleven of them, if any. But the legend of St. Ursula, patron saint of young girls and the martyr for whom the Ursuline order of nuns was named, continues to live despite scholarly quibbles.

Miroculous Seamonship. Somewhere between the rid and (the centures so agoes the legend, there lived in Brittany a princes named Ursula: whose beauty and water in the wild and savage land called gradual continuation of the savage and called legisland. When a pagan English prince named Conon sent ambassadors to ask conditions: that it is the received the savage and the savage land called conditions: that it is the received the savage conditions that it is the received the savage conditions that it is the received the savage conditions that is the received the savage conditions that it is the received the savage conditions that the sa

for herself; 2) she have three years "to honor my virginity, and, with my companions, to visit the holy shrines"; 3) Prince Conon and his court be baptized

Ursula's three conditions were granted. and the 11.011 virgins set out in a fleet of ships on their pilgrimage to the holy places, "It was a wonder," says one account. "to see with what skill these wise virgins steered the vessels and managed the sails, being miraculously taught," Eventually they sailed up the Rhine to Basel, where they disembarked and journeved over the Alps to Rome, Pope Cyriacus was so impressed that, against the remonstrances of his clergy, he decided to join the ladies on their travels, which. Ursula assured him, would end in martyrdom at Cologne.0

Arrows in the Breast, When they reached Cologne after their return from Rome, they found the city under siege by the Huns. Cyriacus and the 11,010 were slaughtered by the pagans, and Ursula herself died with three arrows through her breast when she spurned the advances of their leader.

The bust of St. Ursula, which came back to Basel last week, was made by an unknown 13th century goldsmith when the Basel cathedral received a number of relics of St. Ursula and her 11.010. Auctioned off to a Berlin antique dealer in the 19th century for about \$60, the bust turned up in Amsterdam's Rijksmuseum after World War II. The Dutch agreed to return St. Ursula to Basel for \$50 .-000, which was raised by popular subscription.

Last week crowds lined the Basel streets and wept as the mayor. The Netherlands minister and the 400 Ursulas escorted their patroness home.

Missions in Israel

Under way in Israel this week is a campaign to get Jewish children out of the Christian mission schools. "Our children are being severed from the faith of their fathers." proclaimed a poster signed by Israel's Chief Rabbinate, "The danger to our children from missionaries cannot be exaggerated. They represent a danger to the Jewish religion and nation.

The Christian schools, mostly in Jerusalem, Jaffa, Ramle and Nazareth, were established by the nine major Protestant and the eight major Roman Catholic missions now operating in Israel. Not many Israeli children go to them (about 1.500 of the 300,000 under 14). Those who send their children to the mission schools are mostly poor parents to whom the missions' free hot lunches, free school books (Jewish schools charge parents about \$6 a term) and after-school sports are a big inducement. Some better-off Israelis are also attracted by the Catholic schools because they use French for all lessons, and offer extras-piano, typing, etc. Sponsor of the drive against the Chris-

The Hypnotic Dollars

Having been thoroughly shellacked in audience ratings by CBS's \$64,000 Question, the veteran Truth and Consequences last week moved to a new night and a new time (Fri. 8 p.m., NBC), M.C. Jack Bailey also decided that the only way to fight money is with money and this week will plunk down a \$100,000 jackpot to outbid Question's \$64,000. The gimmick: College Student Pat Morris, 19. after being hypnotized and told that she cannot leave her chair, will get the opportunity of picking up \$100,000 from a table across the stage. If she can break the hypnosis and seize the money, it is all hers. Should Contestant Morris fail, she will still have time to race to NBC's even newer giveaway show. The Big Surprise (Sat. 7:30 p.m.), and, with luck, try for another \$100,000 jackpot.

The Week in Review

Word has gone out that this season's TV dramas are to be "happy stories about happy people with happy problems NBC's Television Playhouse, which TVmen laughingly called the "neurotic hour" because it pioneered in the realistic plays of Paddy (Marty) Chayefsky and Horton (The Trip to Bountiful) Foote, has had a change of producers and a change of view. CBS Story Editor Don Moore concedes that sponsors are begging for "upbeat plays, but argues that it is simply because "morbid themes were overdone and a natural reaction set in." Writer Rod (Patterns) Serling agrees: "Plays of TV's dark brown era-they were usually set on a decaying front porch of a Southern mansion-went down deep but they were run into the ground. Maybe a change is for the better

Insufied Ego. A vigorous opposition to the new trend comes from Vereram TV Producer Fred Coe, who guided the Tele-realistic days, Coe, who have inserted the control of the Television of the Coe, Coe, who have the Coe who have the Teeth on NBC. Chinks TV is becoming the sick man of the arts: "I don't know why the American people should give Ed why the American people should give Ed Coe Television Company of the Coe Television Coe Television Company of the Coe Television Coe Television Coe Television Coe Television Coe Television Company of the Coe Television Coe Television Company of the Coe Television Coe Televisi

"ITV doesn't break the trend itself, is will become the nation's next drug. The public is being simply measurized by the same stories back to back. There is the boy-meete-spil formula, and then there is same stories back to back. There is the boy-meete-spil formula, and then there is the possible of the control of the cut-his is what happened to motion pictures. Cee this week begins his new NBC tenses. BUSINESS

STATE OF BUSINESS You Can't Build Too Fast

"Time and again the Nervous Nellies have cried out that we are moving ahead too fast," said 38-year-old Henry Ford II last week. "But with reasonable and sound planning, we can hardly build too fast. Just to keep from losing ground, we've got to move ahead.'

This was a feeling shared by many of the largest U.S. companies last week. Ford Motor Co. brought out its new \$10,000 Continental (see Autos), and announced that it will spend a thumping \$500 million for expansion next year. Opening a new car and truck assembly plant at Mahwah, N.J. ("To knock the socks off competition"), Henry Ford said

reported the Agriculture Department farm prices ended a decline and edged upward, about 1% between mid-August and mid-September, Machine-tool makers boosted their estimate of orders to \$800 million for this year, a full \$100 million above earlier predictions and a whopping \$240 million above orders for last year. With the auto industry beginning to hit a good production stride, the nation's steel production climbed to 96% of capacity, almost 26% over the same week in 1054. Sales of new cars were roaring ahead: in September's first 20 days. General Motors dealers sold 220,539 automobiles. a fat 63% over the comparable period last year.

Actually, the worry about the big boom last week was not that it might stop, but

The market was soon selling "ex-Eisenhower.

the company would build a new Mercury assembly plant in Los Angeles, expand research centers for autos and farm implements, build another chassis plant in Michigan.

Chrysler Corp. announced that it will build near Macedonia. Ohio an \$85 million body-stamping plant, with enough capacity to supply all passenger-car divisions with fenders, body panels, deck lids and doors. Kaiser Aluminum & Chemical Corp. will spend \$90 million to expand its Ravenswood, W. Va. sheet-and-foil plant, add to other facilities in Maryland, Louisiana and Washington. New Jersey Bell Telephone Co. decided to put out \$100 million worth of new securities over the next two years to keep up with the growing population and record construction

All over the U.S., the economy pushed ahead. For the first time in four months.

that it might roll ahead too fast. The season's new splurge of auto buying pushed consumer credit up another \$250 million to an alltime record of \$33.6 billion. At the Chicago meeting of the American Bankers Association, Treasury Under Secretary Randolph Burgess warned: "The very growth and prosperity of today have brought the threat of inflation." were some bankers who agreed with him. However, many said that they hesitate to turn a customer down, because they know he can very easily take his business to a finance company, or to another bank, Nevertheless, many banks are tighten-

ing credit. (e.g., many now require onethird down on new-car purchases, limit the repayment period to 30 months). Bankers, said A.B.A. Installment Credit Commission Chairman Philip Woollcott. must adopt a policy of "self-restraint and careful selection of risks.

WALL STREET

Black Monday

The swift rise of the 1955 bull market was based on one big premise: President Eisenhower would be elected for a second term in 1056 and the U.S. economic boom would continue, unhindered by any political changes. As the news of Ike's heart attack shattered that confidence, the stock market suffered its worst fall in 26 years. For Wall Streeters the week. end announcement could not have come at a worse time, for the first impulse of thousands upon thousands of small stockholders was to sell. As the selling orders poured in by wire on Sunday to brokerage houses, the bearish pressure on the market built up to enormous strength. By 8:30 a.m. Monday, brokers who hustled into their offices earlier than usual found out how bad it was going to be. In London and Paris, where U.S. stocks are traded, the markets had opened weak a few hours earlier, with many U.S. stocks down as much as 10 points.

Gongs & Shouts, At the opening gong at 10 a.m., the arena-like floor of the New York Stock Exchange was in turmoil; 2,000 brokers, clerks and messengers milled around the 18 trading posts. Many stocks that were not widely traded opened on schedule. But for many of the popular blue-chip stocks, which have led the bull market rise, an opening was impossible, About each post gathered knots of worried men anxiously awaiting buyers for the thousands of shares of stock they had orders to sell. At the center of the hubbub were the specialists who handle the stocks-some dealing in as many as 25 issues, while others work only a single stock. As members of the Exchange, they have the job of making sure that there are always enough orders, both to buy and sell, to keep the market "orderly, i.e., to keep prices from rising or falling too fast. When there are not enough orders, the specialists buy or sell stocks themselves, using their own money. But never have they faced such a crisis as last week's. The orders to sell were so huge-and the buy orders so few-that the specialists were faced with the problem of buying millions of dollars in stocks

-in a panicky market-at their own risk. Frantically, the stock specialists pleaded with brokers to talk their customers into canceling sell orders or, failing that, to help find some buyers. Finally, in desperation to get their big stocks open, the specialists did the only thing they could do: they started buying the stocks for their own accounts, gambling that the break was only temporary and that they would soon be able to get rid of the shares. One specialist was forced to lay out \$618,000 to buy 25,000 shares of American Airlines; two others paid out \$605,000 apiece for 22,000 shares of U.S. Steel stock; the Union Carbide specialist dug into his own funds for \$1,500,000 to

TIME CLOCK

buy 15,000 of the 17,500 shares suddenly dumped on the market. All told, to put some kind of floor under their stocks, the Stock Exchange specialists paid out an estimated \$100 million for stocks that no one wanted at anything like the prices of the previous closing

Rallies & Retreats, Only then did the market leaders start moving. Thanks to the specialists, most of the leading stocks had props to keep them from tumbling too far. Even so, the drops were bad. Raytheon Manufacturing Co. soon went on the board with 16,000 shares sold. down; points from the previous close of 17]. At 10:30, Royal Dutch Petroleum opened with 14,000 shares, down 10 points from 86. Slowly, other blocks appeared on the tape: 15.600 shares of Standard Oil of New Jersey, off 10 from 139 ; 17,000 shares of Cities Service, off off 78 from 798; 20,000 shares of RCA off 51 from 503; 25.000 shares of Bethlehem Steel, off 84 from 164, At 11:38. giant General Motors finally started moving with 55.000 shares sold; at first the loss was only 32 points from 1432, but the pressure was too great. Within minutes G.M. sagged to 135, a loss of nearly 9 points.

By noon, when 3.400.000 shares had been traded, nearly four times the normal amount, a few short rallies started flickering across the board only to die out as new selling waves rolled in. Yet the market handled the huge volume well: the ticker was rarely more than two minutes late. By early afternoon there were still some stocks that the specialists, trying vainly to find buyers for or finance themselves, could not handle. American Tohacco, Du Pont. Procter & Gamble, General Foods were still not open. Not until 3 o'clock. 30 minutes before the close, did Du Pont finally get on the board. The price: 11,000 shares at 210, down a whonping 20% points.

But by then, the worst was over. The intermittent rallies trickling in picked up strength as bargain-hunting investors jumped into the market. The big investors, such as insurance companies and investment trusts, who had not joined the

first waves of selling, now started buying. The Cost, When all was over, the session added up to the blackest 55 hours the New York Stock Exchange had seen since Oct. 29, 1929. All told. 7,720,000 shares, more than double the usual number, had been traded. On the Dow-Jones averages, industrials plummeted 31.89 points. rails 11.15 points. utilities 2.46 points; in industrials the nose dive just about matched the drop that occurred when the market first collapsed in 1929. Overall, the composite average of 65 stocks showed a drop of 10.76 points to 162.75. Half the entire 1955 gain had been wiped out. The depreciation on 1,500 stocks listed on the Big Board amounted to a staggering \$14 billion and the sharpMEAT PRICES WILL DROP this winter. Record slaughters and recent drops in wholesale hog prices have cut the retail price of pork chops by 6%, loin roast by 10%, bacon 2%, ham 5%, with more reductions in prospect straight through until next March. Beef prices, which have been rising, will follow the trend, are ex-pected to start dropping next month.

URANIUM HUNT will be started by Texas Co., 14th biggest U.S. in-dustrial company. The oil company dustrial company. will form a new \$6,000,000 firm with will form a new \$5,000,000 frm with two other smaller companies (New Jersey Zinc Co., Shattuck Denn Min-ing Corp.) to lease several hundred square miles of potential uranium lands in Arizona, New Mexico and southern Utah.

CIGARETTE SMOKING will jump 4% in 1955, reversing a two-year dip, and keep climbing in 1956, predicts the U.S. Agriculture Depart-ment. The forecast: 383 billion smokes in 1955, some 15 billion more than last year and only 11 billion short of the alltime peak in 1952.

VIDEO BOOM has put TV sets into two out of every three U.S. households in the last five years, re-With ports the Census Bureau. million sets currently in use, 46% of all rural homes have TV, while in metropolitan areas TV is nearing the saturation point, with almost 80% of all families owning sets.

MEXICAN NATURAL GAS will soon be supplied to U.S. markets in quantity for the first time. Pemex (Mexico's national oil and gas company) has signed a deal with Texas Eastern Transmission Corp. to ex-port between 100 million and 200 million cu. ft. of methane gas daily from Reynosa, Mexico through pipelines to Eastern U.S. consumers,

LIGHTWEIGHT TRAIN is picking up speed on U.S. railroads. New England's Boston & Maine Railroad has ordered a Talgo train similar to the ones being built for the New Haven and the Rock Island, Ameri-

est break since October 1920, when losses

On Wall Street the gloom hung thicker than London fog. Most knew that the specialists had bought all they couldstretching their financial resources close to the breaking point. Brokers felt that if Ike had taken a turn for the worse on Monday, many a specialist would have gone under

The Second Bounce, But with cheering news from both the President's bedside and from U.S. business itself (see above), the market rehounded sharply, On Tuesday and Wednesday a few big institutional buyers and thousands of small investors who had busily sold on Monday started buying hand over fist. At week's end a flurry of short-term profittaking took some of the bounce out of the

U.S. TOURISTS abroad have been spending more than ever before, says the Commerce Department. The 1955 forecast: \$1.5 billion, nearly \$200 million more than the previous peak set last year.

KRUPP, Germany's famed wartime munitions-maker, is going back into armaments, this time to make aircraft. Krupp's partner: Designer Heinrich Focke of the wartime team of Focke-Wulf, which turned out the famed Fw-190 Nazi fighter.

PATENT PIRACY by a Japanese drug firm has been stopped, at least drug nrm has been stopped, at least for the time being. In Japan's most important patent decision since World War II, a Tokyo court ordered the powerful Meiji Seika company to stop manufacturing aureomycin without permission from American Cyanamid. The court rejected the local firm's contention that it had discovered a new type of aure-omycin in mud and that it should be allowed to continue production for "special reasons," i.e., nationalism.

GUIDED MISSILE PROGRESS in so fast that Douglas Aircraft Co. will set up an independent missile engineering department separate from the company's aircraft work. Lo-cated at Santa Monica, Calif., new missiles department will have its own buildings and labs, a special corps of engineers to work fulltime on eight projects for the Army, Navy and Air Force.

VENEZUELAN STEEL will be competing with the U.S. product for South American markets within the next few years. Venezuela has signed next few years. Venezuela has signed a \$128 million contract with Italy's. Fiat Motor Car Co. to build the country's first big steel plant on the Orinoco River near the big Cerro Bolivar iron ore deposits. To be completed in late 1957, new plant will have an eventual capacity of 421,000 tons of steel annually.

rebound. But still. Dow-Jones industrials closed at 466.62, some 11 points higher than on the day of the break, and the rest of the Board followed along.

Solid Base. The most notable thing about the break was how well the stock market withstood the shock. For months many Wall Streeters have felt that some stocks, notably blue chips, were too high compared to earnings and dividends, and were ripe for a fall on any bad news, Ike's heart attack was about as bad a shock as the market could get. The fact that it had absorbed the huge selling and started up again seemed to be the best evidence that it was on a solid base. In the long run, most brokers thought that the shake-out would prove to be a good thing. They said that the stock market, where stocks are listed as selling "ex-dividend" immediate-

U.S. AIRLINE POLICY——

More Competition Means Cheaper Fares

To U.S. travelers, the airplane is fast becoming almost as familiar as the family car. In 1955 scheduled domestic airlines will gross an estimated \$1.1 billion, flying 35 million passengers 20 billion miles, 20% more than last year's alltime record. A few years hence, airmen predict the fastgrowing airlines will push out railroads as the No. 1 public means of mass travel. As a result, U.S. civil air policy, as laid down by the Civil Aeronautics Board, is undergoing a radical change. Once CAB nursed along the fledgling industry by spoon-feeding it Government subsidies and holding back competition. Not only is this method now out-of-date; it does not fit an expanding industry. CAB Chairman Ross Rizley feels that the time has come for additional service. lustier competition and new route awards. The question is: How much new competition?

To many airline men, the mere thought of more competition means trouble. Some of them argue that more competition has often led to fewer passengers for individual lines, lower earnings, and thus increased need for federal subsidies to keep flying. But CAB thinks that the airlines underrate their strength, and points to the industry's own skyrocketing growth. In 1951 every U.S. carrier, both big and little, was on Government subsidy. Today only the smaller feeder lines and a few shaky trunk lines need a direct Government handout. Though they still earn heavy mail pay, all nine of the biggest carriers (American, Eastern, United, T.W.A., National, Northwest, Capital, Delta, Western) are self-supporting on their domestic runs. Overall estimates are that the industry will tot up a net operating profit of at least \$150 million in 1955 v. \$99.5 million last year. As a result, federal subsidies have dropped from \$73 million in fiscal 1954 to an estimated \$52.5 million in fiscal 1955.

To help the industry grow even faster, CAB has laid out a gradual carefully charted course of expansion and competition. Since the big trunk lines no longer need coddling, CAB has cleared its docket of a dozen major decisions, some of which had been hanging fire for seven years. Recently, it approved a whole series of competitive new routes. T.W.A., Capital and Northwest got new, nonstop runs between New York and Chicago in competition with United and American: United got a nonstop Chicago-to-Seattle run in competition with Northwest, while Northwest in turn got a local nonstop Detroit-to-New Vork flight in competition with American and United. To improve service between the Northeast and Southwest CAB has tentatively approved new route segments totaling 6.810 miles for American, Eastern, Capital and T.W.A. Furthermore, it is doing its best to beef up 13 small feeder airlines (Mohawk. Allegheny. Bonanza. etc.), put them in position to get off their \$25 million annual subsidy by handing out new routes-some of them in competition with big airlines-and permanent certificates as scheduled carriers. The airlines view the new routes as mixed blessings. The airlines liked getting new routes that gave them a crack at someone else's passengers, but almost all have protested new routes that increased their own competition.

Despite the gripes, the effect of competition on U.S. airlines in recent years has been all to the good. The entire scheduled industry rose up angrily when nonscheduled airlines first tried cut-rate flights, argued that there was only so much business, that rates had to be kept high to provide efficient service. But the nonskeds did so well that the big airlines were forced into air-coach service. Result: 10 million passengers now fly air coach annually, while the four biggest scheduled lines currently get 34.3% of their total revenue from low-fare flights. As a final salute to the nonskeds. American, one way. v. \$158 first-class, and are now on a level with the cheapest nonsked.

More important, CAB is now considering giving nonscheduled airlines a big lift. Though the big scheduled carriers insist that the nonskeds be knocked out of the air. CAB feels that they have proved their worth by pioneering cut-rate flying. In an initial decision, which the full board will probably follow, a CAB examiner recommended that 27 of the weakest nonskeds be eliminated, but that the 33 survivors be permanently certified for a specific number of scheduled passenger flights (possibly ten) each month, plus an unlimited number of nonscheduled flights.

All this means that a new air age is coming for the U.S. As a result of the rapid expansion of routes and increased competition of routes and increased competition in the result of the retieve of the result of the retieve of the retieve of the redistance runs. U.S. tracelers still soon be able to fly anywhere they choose, day or night, and do it faster and cheaser than ever before. ly after the record date for payment of a dividend, is now selling "ex-Eisenhower." Anyone who buys stocks must take into account the possibility that like may not run again, that there may be great political changes in the next few years. The fact that thousands of investors rushed fact that the shock that the shock is the state of the fact that the shock it bey still had faith in the solidity and continuing growth of the U.S. commy.

The Youngsters

The venerable New York Stock Exchange last week tipped its hat to youth. Three young Salt Lake City brokers, Eddown St. Soon and were approved for an exchange seat in Dumle's name. Thus, as exchange seat in Dumle's name. Thus, as Dumle & Light were the youngest partnership, in terms of average age, ever admitted to Big Board membership.

The three met while working for Salt Lake City's J. A. Holge & Co., soon came to the conclusion that a stock salesman's salary and commissions were not enough. Salary and commissions were not enough boom and has the start of the uranium boom and has the start of the uranium boom and has the salary sala

Muir and Dumke then formed a broker, age firm to trade mostly in penny uranium stocks. Early last year they brought Light and his cash into the partnership, whose net worth now is \$5:0000. Their goal when they launched Muir. Dumke & Light was to get a Big Board seat within five years. "Now that we have accomplished years." When that we have accomplished the longest potential experience of any partnership in the country."

RETAIL TRADE

Doss Fair Trade bring higher or lower prices? Last week, after a pars-long study of the question. University of Chicago Economist Ward S. Bowman Jr. reported that Fair Trade tends to raise retail prices. As part of his research. Bowman pieked a typical product, toothpaste, and checked retail prices all over the nation. Concludes the product of the price of the price

Some manufacturers, says Bownian, may find price-fixing necessary in special cases, e.g., to keep service dealers in business, to protect an investment in technical instruction to dealers. But most manufacturers do not have and do not want price maintenance, he says, for the simple the most merchandise at the lowest possible cost, "

* Though not the youngest individuals. Lawrence Cowen, now president of Lionel Corp., bought a seat in 1929 at the age of 21.

FORD'S WILLIAM FORD & CONTINENTAL Off to the races.

AUTOS The New Continental

Among the Ford family the car was known as "Billily's toy." This week young (30 William tay Ford rolled his toy out for all the work of the care to the control to the care to the care to the care to Motor Co.'s Continental Mark II, the rogo version of the classic Lincoln Continental, which many car buffs consider the best-dooking U.S. car ever designed. With his toy, Billy Ford hopes to race past Cadillica and take over as builder of the nation's No. 1 prestige car. Price of the Continental: Stoopo.

Though the new Continental has been redesigned from rubber to roof, it is deliberately reminiscent of its famed predecessor. The body is long (18 ft. 2 in.) and low (56 in.). The spare-tire mount, a hallmark of the old Continental, is now molded into the trunk lid. Under its 6-ft, hood is a souped-up Lincoln engine with an estimated 300 h.p. (because Ford wants to avoid a horsepower contest with other big cars, the exact figures are secret). Automatic transmission, power steering, power brakes and power windows are standard equipment; the sole optional feature is air conditioning. To preserve its elegant finish (two double coats of lacquer, triplethickness chromium plating), each Continental will be shipped to the dealer in a fleece-lined canvas and plastic envelope,

Ford hopes that the new Continental will become as famed as the original which was first styled by Edsel Ford and custom-built as a personal car. On a trip to Florida Edsel got so many requests for a car like his that he put the Continental into production in 1940. Though Ford collected dividends in prestige for the 5,322 Continentals it built, it lost money on every car. When the company skidded into the red after World War II, it stopped making them. Three years ago, after Ford moved solidly back in the black. Benson Ford proposed that the company revive the Continental, and brother Billy was later put in charge of a new Continental division, given a new \$25 million factory near Dearborn to produce the car.

To build up interest, pressagents let word leak that potential customers would be checked for social standing. As a result, many buyers sent in pedigrees, along with deposit checks on a new car. The president of a big insurance company sent a three-page biography, listed his clubs and well-placed friends. All told, 2.00 orders have come in.[®] Production will be limited to about 4.000 cars yearly, less than expected demand.

CORPORATIONS Harvester Cools Off

Only a year ago. International Harvester's President John L. McCaiffey, told shareholders: 'We have established a solid shareholders: 'We have established a solid footing in the highly competitive refrigeration industry in the short time we have seemed on even solider footing, as it is considered to the solider footing, as it doubled the number of its of permittent, offices and trumpeted that it was launche offices and trumpeted that it was launche ing a multimillion-dollar sales program. Last week Harvester revealed that it had been treading on thin ice all along; it

ne One buyer was Argentina's ex-Dictator Perón, whose new blue Continental was shipped a month ago. Quipped Billy Ford: "Whoever ends up with that car will probably be the real boss of Armetica".

quit the freezer business. The company sold its 962,000-8q, ft. Evanssville, Ind. refrigerator plant for \$15\] mallion to fast-growing Whirlpool-Seeger Corp. (which is backed by RCA and Sears, Roebuck.) announced that henceforth it would stick to its \$1\] when the solution of the solut

Executives explained that Harvester which slid into the refrigeration business in the early '30s by producing milk cool-ers for the farm trade, then into air conditioners, refrigerators and home freezers, had discovered that it faced a choice, To survive in the cutthroat refrigeration line, it would have to change its operation radically, put in a complete set of appliances, expand out of the familiar farm market into the big urban markets, recruit a huge new dealer organization. then fight for a tremendous volume to make a profit. Said President McCaffrey: "We felt we'd rather take our efforts and our capital and invest them in things that are more nearly related to our main activity.'

MANAGEMENT After the Third Highball

"Too many men in American industry think of free enterprise as a hunting li-cense, as something they use to get what they want too themselves. [They don't) measure up to the responsibility side of recenterprise, which requires standing on your own feet." Thus last week Inland also an adviser on force framedial, who is also an adviser on force framedial, who is it is not to be a definition, and though the work of the standard of the work of the standard of th

There are too many businessmen. said Randall before the 81st annual meeting of the American Bankers Association, who the American Bankers Association who otage the competitive system. The "man who makes the discrete telephone call to a competitor before he puts in the new price is asking for the nationalization, the so-cialization that he so abhors."

Another suboteur is the man who seeks a "Government subidy." a way "of get-ting money out of the Government and into his business and not getting caught at it. One is the 'Buy America' policy [favor-ing American ibdders over foreign competitors], which funnels profits into the labor groups. Surely the great certain labor groups. Surely the great certain tions can struggle along without a 105% of each over their foreign competitions.

Randall condemned "American business which I cannot operate without a high protective tariff. Were cannot benefit one segment of the American people by a high protective tariff unless some other seasons pass for it. You can restrict the flow the seasons of the seasons with the seasons of the seasons with the seasons of the seasons with the seas

Having taken care of anyone who favors a protective tariff. Randall then clobbered businessmen for "evading responsibilities." Companies in metropolitan centers tend

to "shrug off" their obligation to support the "schools, the churches, the hospitals, all of the community services, [which are] all a part of the price of doing business." As for higher education, said Randall, "only recently has industry begun to sense that there is an obligation on it to maintain by direct grants the universities [from which] comes the new leadership.

As for the Government, "after about the third highball, listen to the businessman tell what rascals—congenital nitwits they are in Washington, Tay that man on the shoulder" to come down to Washington, and "immediately you find you are in the presence of the indispensable man whose presence at his company is essential to its preservation.

"Most of the business world "anted President Eisenhower to be elected." said Randall. But he seemed to think that "few have supported his policies. I have found more dedicated, selfless men among the hureaucrats than I know in business. I see them at their desks | in Washington | at 6 o'clock Saturday aftermoon when the

boys back home are playing the 19th hole.

"I sometimes even wonder in my inner heart whether the businessman who sabulages the competitive system is not a greater enemy of our way of life than the Communists that he cries out against."

The Unpaid Coffee Break

When Deriver Tiemaker Phil Greiniets to be the Service to the amed force during World War II. he hired eldedy women for his little (zo looms) Los Wijr. wam Weavers. They were fine workers but tired easily. At their suggestion, he experimented with 15-minute rest breash morning and altermoon and provided coffee. When Greinets found that workers who took the break produced more ties, he made it compulsory. But since wages were the test time. The employees did not care; as production soared, earnings on piece rates went up to \$5.0.5 hourly to \$5.0

Exceptibility to the multil a U.S. De-Exceptibility to the many properties of the contraction of the many properties of the many properties of the "As soon as they step in your shop, they are on your time." Greinetz refused to jusy, so the Labor Department took the question to Colorado's V.S. District Court.

Last week Greinetz won his point. Ruled Federal Judie Jean S. Breitenstein: "These are older people who need this break to enable them to work. Into there is large to the property of the pro

3 In a test case early this year, California's Industrial Accident Commission ruled that a worker who broke a leg while rashing out of the office during a coffee break was entitled to workmen's commensation.

Inaveloader...revolutionizes long load handling!

Here at last is a practical answer to the awkward problems of yard handling and particularly those nightmarish long loads. Traveloader combines the unique ability to pick up, carry and stack long, unwieldy or multiple pallet loads —indoors or out. Operating over paved or unpaved roadways, it does the job fast, safely, and much cheaper than other equipment. This one machine, with one operator, replaces two and often three fork trucks, portable cranes or straddle carriers, and does the job better. You save manpower, cost of buying and maintaining other expensive equipment, aisle space, and timé. Because Traveloader loads from the side and carries loads lengthwise, it requires much less aisle space than fork trucks.

Unlike a straddle carrier, this new machine can stack up to 12 feet high. And when traveling, the load is nested safely aboard the Traveloader's deck, climinating dangerous dangling and swaying of load, distributing load evenly over four large wheels, and making speeds up to 30 MPH practical and safe.

Write for descriptive bulletin No. 1360.

ONLY TRAVELOADER

Picks up like a straddle truck - Delivers like a fighway truck - Stacks like a fork truck

Visible Export

Diana Dors is the kind of girl that can happen anywhere-and sometimes does. What Marilyn Monroe is to the U.S., what Gina Lollobrigida is to Italy, what Martine Carol is to France, shapely, blueeyed Diana Dors. 24. is to Great Britain. Diana is a platinum blonde whose indefinable chemistry and heady allure have been greeted with international enthusiasm. The blasé French have called her "ravissante." The Italians have sighed "Muma mia!" Even the British, ever fond of understatement, have referred to her as "Britain's best visible export," Not one to belittle herself, Diana, once carried away by the symmetry of her own 35-23-35 figure, cried: "What merchandise! And how how it sells!

Libidinous Lip. Diana sells so well that she has become 1) England's highest paid vaudeville entertainer at £1,000 (\$2,800) a week, and 2) the nation's second highest J. Arthur Rank has signed her to a new long-term contract, and experts say that he has acquired in one stroke "the most valuable property in British films today' and the girl with "the most libidinous lower lip in the business.

She was born Diana Fluck in grimy Swindon, in the industrial Midlands, and got started young. At 13, wearing a tight bathing suit, she passed for 17 ("I was very advanced") and won a beauty contest. At 15, she had played in four movies. but at 17, she was a has-been, the victim

At 19. she married Dennis Hamilton Gittins, an engineer, and bought a secondhand Rolls Royce ("A Rolls gives a girl such confidence"). She also began showing a remarkable talent for grabbing publicity. When she was hauled into court for nonpayment of rent, the judge noted that she was a minor and ruled: "It is the duty of the court to protect infants. A big-circulation Sunday paper printed a huge picture of Diana in scanties, headlined: JUDGE SAYS THIS BABY NEEDS PROTECTION

To take care of her professional commitments and a profitable real-estate side-Dors Ltd. Soon, because she drew £60 weekly for tax-free "business expenses, Diana became an issue in Commons, Conservative M.P. Henry Price gravely asked. "Do you not feel that figures of that kind should be closely scrutinized?

Blue for Blondes, Diana is tireless at publicizing Diana. She posed almost nude for a bestselling booklet called Diana Dors in Three D. Clad in a mink bikini, she skimmed down Venice's Grand Canal on the prow of a gondola. Meanwhile, she worked hard to prove herself an expert mimic. She can skillfully play Cockneys. Scotsmen, Irishmen and Americans, Crit-

Highest. Vivien Leigh, at £50,000 (\$140,000)

ics like her ("Her main gift is impertinence. Not only does she stimulate the libido, she also transmits charm . . . and is about as neurotic as an ice-cream cornet*"). The public takes to her, too.

Diana's success has brought her a lavish villa on the Thames (private cinema room with leopardskin chairs, floodlit tennis court, aviary), a powder blue Cadillac ("Blue is a wonderful color for blondes; even our lawn mower is blue"), a 50-ft. launch (for moonlight glides up the river). and a monoplane for longer trips.

Last week Diana was learning lines for her next movie role-the condemned murderess in the film version of Vield to the Night (TIME, Sept. 20, 1954). She feels that English directors are wary of sex ("I don't think they know quite what to do with it"), says that after playing in a death cell, she will be happy to get back into a boudoir: "I might as well cash in on my sex now while I've got it. It can't last forever, can it?'

New Picture

The Desperate Hours (Paramount) is a thriller that jabs so shrewdly and sharply at sensibility that the moviegoer's eve might feel that it has not so much been entertained as used for a pincushion. But to melodrama fans, it may prove one of the most pleasurably prostrating evenings ever spent in a movie house.

The picture, written by Joseph Hayes, who has also compounded his felony into a hit play on Broadway, is based on his bestselling novel of the same name. It tells the story of an Indianapolis family held prisoner in its own home by three escaped convicts who are ready to do anything, and the worse the better, to avoid

And so the bong term doed begins, will also with an will across will, between the embattled householder and the leering principle of unreason that fats in his refrigerator and lords it on his hearth law is not less that the law is not realises that the law is not less that where the crimnials are hiding, they are sure to come after them, and when they do. Bogart & Co., as promised will make sure that the house stands alone, and if he falls also family falls with him. What to doe'.

"Live it normal," Bogart suggests, and normal they all try desperately to make it look. Mother goes shopping as usual answers the phone and the door, chals prossibly with teacher when she comes to see if Richard, who has stayed home "sick" from school, is feeling any better. Father and daughter go to work in the morning, and in the evening daughter dates her young lawyer (Gig Young, But people make lawyer (Gig Young, But people make

Gray matter in an electronic brain,

this tiny maze of tubes and wires is part of an air data system
that both "thinks" and "acts" for the pilots of our modern aircraft.

"Feelers" send information on speed, position, temperature and other
factors to a central computer, which analyzes the data and either
provides information to the pilot or actually acts with hairline
accuracy to adjust for rapidly changing conditions. The system's split
second computations make possible safer, more economical flight at any
altitude or speed. It is another AiResearch contribution to industrial progress.

mistales. Little Richard writes a warning to teacher in his copybook, and father intercepts it only just in time. Another intercepts it only just in time. Another intercepts it only just in time. Another of opportunity, to lock two of the brutes out of the house and werepower a third. He leaps to the phone—only to hear his wife cry out that Bogart has got the boy, who had chosen that moment for any other his properties of the phone—and run for help. Worst of all, the rubbish man starts snooping around—and finds his own grave.

One Broadway critic called the play "an almost perfect melodrama." lacks a few of the psychological grace notes of the play, but Author Hayes has written a meller with the coiling continuity of a whiplash, and a savage snapper at the end of it. Producer-Director William Wyler has the capacity to see the whole of a motion picture in one flash across the private screen of imagination; and into this sense of the whole he can interpolate ornament-all kinds of human dado and humoristic acanthus-with a skill that gives spontaneity to the grand design without collapsing its tension. Does the little boy refuse to drink his milk? Just let Bogart side with him against his parents, and he downs the whole glass

in a gulp. In The Desperate Hours, Director Wyler has subordinated his actors with unusual severity to the pace of the plot. and most of them have taken to the rein like the thoroughbreds they are. Bogart gives a piteously horrible impression of the essential criminal, the man who has to take because he is too weak to give. And Richard Ever, as the boy, is a regular little darb. Fredric March, by the dignity of his performance, lends to the father's role a sense of legendary size that reminds a moviegoer-in a picture that might otherwise have had high muzzle velocity but slight penetration-that he is witnessing not only an animated newspaper headline, but also a plain parable about human rights and the majesty of the patriarchal principle, which, from the day of the cave to the advent of the split-level, has kept the wolf from the door.

Life with Genius

HERITAGE (309 pp.)-Anthony West Random House (\$3.75).

Dickie Savage's schoolmate meant it when he exclaimed: "You are a lucky beast; I'd love to have exciting parents like that." Dickie's mother was the great actress, Naomi Savage-beautiful, talented. unpredictable. His father. Max Town. was one of the world's most famous writers. Dickie saw dad's pictures in the papers; his novels were everywhere; and everything he said was taken seriously by serious people throughout the world. But there was one great drawback to being the son of Naomi and Max: they were not married and never had been

Dickie lived with his mother, and the first time he ever saw Max was when the great man visited him at school accompanied by his German mistress. Right in front of the horrified headmaster, she asked Max to father a boy for her, just like Dickie, whom she could take back to

Germany.

As the son of famed British Writers Rebecca West and the late H. G. Wells (who were never married, either), Novelist Anthony West has a pretty fair idea of what it means to be a Dickie Savage. In Heritage, his third novel and his best, he gracefully charts young Savage's uncertain course from childhood hurt to freewheeling young manhood. In other hands this could have been a sour book; instead, it is intelligent, witty, and tolerant toward the childishness of the great. Both Naomi and Max were good to

Dickie only when it made them feel good. But the first time he saw mamma on stage, her performance made him cry. He knew then that the theater meant more to

NOVELIST WEST The great need understanding.

her than Dickie Savage, As for Max, he had his books to write, his pleasures to enjoy, his mistresses to cope with. But he tried to keep Dickie virginal, scolded him for wanting to be a poet, tried in fact to keep him from doing what Max Town had

When mamma marries a dull and decent man, then leaves him again for the theater. Dickie is the least surprised person in England. When one of Max's mistresses dies on his hands, and he, at 60. goes off with another, that too seems reasonable enough. With World War II just around the corner. Dickie Savage has in fact grown up and become a bit blasé. Heritage does not say that creative people are exempt from the rules of ordinary decency. But Author West tries to understand them and suggests that even illegitimacy and neglect are not too much to endure for the rare privilege of growing up with genius.

Huckster in the Tabernacle

BILLY SUNDAY WAS HIS REAL NAME [325 pp.]-William G. McLoughlin -University of Chicago Press (\$5.50).

The people of the U.S., who dearly love a good show and are addicted to the principle of truth by endorsement, could not resist a born showman who had once batted .359 for the Chicago White Sox. His name. Billy Sunday, seemed like an assurance of all things good and democratic, and he was endorsed by John D. Rocke-

This helps explain the remarkable fact that a man who boasted that he did not know "any more about theology than a jack rabbit knows about pingpong" should have drawn the greatest congregations in history. In the days before radio had disembodied the audience. 100 million Americans came "in person" to hear Billy Sunday. He "saved" a million of them, at the

cost, he said, of \$2 a soul. Home Run in Heaven. He was the nation's favorite orator, at the peak of his decibels more popular even than silvertongued William Jennings Bryan. Billy put up tabernacles wherever he wentbasilicas of raw boards on the reassuring lines of a barn. The tabernacle had several advantages over the tent-it was safer. the used lumber could be sold, and the noise of hammering in the little towns advertised Sunday's approach for a week in advance. Carloads of sawdust provided an acoustical baffle and a path for sinners to walk forward. On a stage high above the audience, flanked by brass instruments and brass-throated singers. Billy Sunday's sack suit, white waistcoat, wing collar and spats were put through some of the strangest performances ever enacted in the name of religion. The show awed even the reporters, who sat below the stage in a fine rain of perspiration from the evangelist's flailing arms and contorted brow.

Billy put on a vaudeville show for the Lord and organized it on big-business lines,

EVANGELIST SUNDAY The Lord got a vaudeville show.

Apart from his habitual pitcher's stance. he had a repertory of skits which included 1) the unrepentant drunk; 2) the "rednosed, buttermilk-eyed, beetle-browed, peanut-brained, stall-fed old saloonkeeper"; 3) the society woman who spends her time on yachts drinking wine, her "miserable hands red with blood.

His masterpiece was probably his theological version of the popular poem, Slide, Kelly, Slide! In this. Sunday impersonated both God (The Great Umpire of the Universe) and poor Kelly himself, who had taken to the booze. It was climaxed by a home-base slide across the splintery pine boards and the dramatic cry: "You're out, Kelly!" (i.e., of Heaven).

Forgotten Man. Were the thousands who hit the sawdust trail much different from what they were before they hit? Author William G. McLoughlin Jr., a political science professor at Brown University and Billy Sunday's first full-dress biographer, believes that most of the "converts" were already pious members of the rural middle class, giving themselves a resounding vote of confidence. Sunday's product was relatively painless. Only a hog-jowled anarchist, an evil foreign monarch or a bedizened society woman could object to it. Billy's converts did not have to wrestle with the Lord on their knees and publicly confess their sins. They accepted the evangelist's big, red-blooded handshake and sometimes they signed a vague little pledge card.

But the U.S. began to tire of Sunday, Heywood Broun (not yet a Roman Catholic) called him the "tank-town Torquemada." Princeton's Dean Andrew West, 'in the name of . . . the purity and sanctity of our Christian faith," denied Billy

presents the colorful Comfort Master DeLuxe

bringing you the utmost in luxury ... finest of seven adjustable chairs

Not only built-in luxury... but built-in efficiency, too... make this America's No. 1 executive chair. The handsome appearance and restful ease of the GF Comfort Master DeLuse... which is readily adjustable to any size individual... are matters of higher morale, as well as greater comfort for your key executives.

Built of sturdy, welded aluminum, the frame of the Comfort Master DeLuxe comes in various attractive anodized colors, as well as sparkling natural aluminum. And for the chair's upholstery, you may select your own preference from smart colors in rich Bedford cloth to blend with other office furniture and surroundings.

As a cold dollars and cents investment, the GF Comfort Master DeLuxe outlasts ordinary chairs by a matter of many years . . . pays for its original cost many times over.

Test a Comfort Master DeLuxe for 10 days in your own office . . . without obligation, of course. Visit your GF dealer to see this and other modern styles of adjustable aluminum office

TIME, OCTOBER 10, 1955

"Why Id like my own boys to be oilmen"

by Bud Wilkinson

Head Football Coach, University of Oklahoma

 $A^{\scriptscriptstyle
m LMOST}$ half the boys who play football for me at Oklahoma go into the oil business. This remarkably high percentage is no accident. You see, out here in the oil country, we have a good opportunity to watch America's oil industry in action. And, franklywe like what we see.

Many a boy has heard me say that the oil business is an ideal career for young Americans. Here's why I feel that way: First, there is the great variety of opportunity. I'm told there are over 40,000 U.S. oil companies - and, judging from the number of oil company job recruiters who search for talent on this campus, I can well believe it.

This great number of companies means lots of jobs. But, more importantly, in the complex oil business, it means over 2,000 different kinds of jobs. Oil companies don't just need geologists, engineers, and research scientists they also need everything from good accountants and salesmen to aerial photographers and oil tanker officers. So no matter where a boy's-or a girl's-interest and tal-

ent lie, there's sure to be a right spot in the oil industry. That's reason enough

for young people to choose oil as a career. But, in my opinion, there's an even more powerful drawing card -it is the intensely competitive spirit of the oil industry!

Any football coach.

of course, has great faith in the benefits of competition. Every day we see how it brings out the very best in the boys we coach. And I don't just mean the competition with a rival athlete or team. I mean a boy's competition with himself to realize his own potential as fully as possible-to push himself beyond the best he's ever done before

That's how competition builds good men. And, by the same token, competition is good for an industry, too. Competition among U. S. oil companies is so keen that each company can only stay ahead of its rivals by continually reach-

Bud Wilkinson, head coach and athletic director at the University of Oklahoma, has compiled one of the most remarkable records in the history of college football-his Oklahoma teams have won 70 game while losing only 7 and tying 31 Twice Bud himself has been voted "Coach of the Year." At Oklahoma, in the oil country, he has had an excellent opportunity to evaluate the oil business - as an industry and as a possible career for young Americans,

ing the public-you and me-with a flow of new or improved products and services.

In this kind of a competitive struggle our young people find that initiative, imagination and hard work get quick recognition. Oil companies need their talent, their enthusiasm, their courageand, from what I've seen, these qualities are well rewarded.

I'll be most happy if, some day, my own two youngsters choose oil as a career. Above all else, I want them to have freedom of opportunity. And, in our oil industry, competition guarantees them this vital freedom.

This is one of a series of reports by outstanding Americans who were invited to examine the job being done by the U.S. oil industry. This page is presented for your information by The American Petroleum Institute, 50 West 30th Street, New York 20, N.Y. 130

in the Soviet Union, with a luxurious apartment in Muscow, a dacha in the country, a villa in the south, a talented wife, and a rast-angle of oreigneed does. But in his latest novel, published in Russian and the south of the south of the south of the south living at all. Whereupon his is a bit of a bore and wondered that live it is worth living at all. Whereupon his fellow workers in literature were ready to tear him to pieces in a comradely way missiak word or south of the south o

How could an old hand like Ehrenburg, who got a remarkable fan letter on the occasion of an earlier book ("I have enjoyed your novel very much .-- J Sta-). commit such a mistake? Well, since Fan Stalin died, the word had got around somehow that it was all right to have novels with people in them againjust like Tolstoy. The New Neanderthalers in The Thaw-bureaucrats, engineers, state artists-are not exactly people, but sometimes Author Ehrenburg lets them wonder in a dull-witted way why they are not. Perhaps the Ice Age of Communism might some day thaw. Savchenko, an engineer, even has a vision of the future: "Huge tractors rushing out into the steppe, then corn, lots and lots of corn . . . Anybody would feel happy in such a factory. And there are other things: there's Hamlet." It was "the other things" represented by Hamlet-a monarcho-fascist intellectual degenerate if ever there was one-that got Ehrenburg into all his trouble. The Thaw's plot may be summarized as the ups and downs of a pack of dull-spirited clods on the greasy pole of Soviet respectability. Will Juravliov with his uncultured principles continue as factory manager? Will Artist Volodya ever paint anything as good as his big picture of "The Feast at the Col-lective Farm?" The whole thing is written in Piltdown Prose-both primitive and

One intriguing fact that might give Ehrenburg rouble all over again, the book's U.S. publisher is Chicago's Henry Regnery. a man of marked anti-Soviet opinions—exactly the sort Ehrenburg means when the talks about imperialist hyeras. What is more. Regnery commissioned Fellow Hyera Rusself Krist *The Conservative Mind's to explain in an action of the Conservative Mind to explain in an action of the Conservative Mind to explain in an action of the Conservative Mind to explain in an action of the Conservative Mind to explain in an action of the decadful and the Revolutionary Utopia. A last added away to this boredom with the present and this indifference to the futures.

Self-Made Martyr

MY LIFE FOR MY SHEEP (341 pp.)— Alfred Duggan—Coward-McCann (\$5).

Martyrs are rarely popular. Their persecutors. haunted by persistent ghosts, find them stronger in death than in life. Their fellow believers, faced by heroic example, find them reproaching a safe and compromising existence. By the 18th century, the whole business of martyrdom was widely considered to be fanatical and rather ill-mannered. A gibbous Gibbon

PROTECTION

AGENT

Risks exist in every business, hazards in every home.

You cannot safely conduct business ... or even run a household ... without protection.

Today property of any sort should be protected... and the man qualified to do it is National's Protection Agent. He represents the National of Hattford Group of insurance companies. Maybe you think of the police department to protect you against theft or the fire departmentagainst fire. But should these claim of the protect you also should be added to the protect you also should be added to the protect you.

National's Protection Agent is an expert, licensed by the state. He surveys your property, appraises your risks, recommends what your coverage

should be against each one.

Part of his job is to write up policies and place them for you with reputable insurance companies. In doing so, he selects companies rated financially able to repay you in case of loss . . . companies with a reputation for paying claims promptly.

Odd face: National's Protection Agent is not obliged to insure you with the companies in the National of Hartford Group. When he does, it is because his experience and judgment rell him National will best serve your interests.

That is one more reason you are urged to get in touch today with National's Protection Agent in your community.

age that saw the fall of the Roman Empire as caused by Christianity was apt to feel that the early Christian martyrs were really the spiritual aggressors who provoked legitimate rulers. In other words, those martyrs asked for it.

Something of that feeling carries over into this English biography of Thomas à Becket, archbishop, martyr, and definitely a man who asked for it. Becket was the first famous victim in a struggle between church and state that culminated, four centuries later, in Henry VIII's breach with Rome. But historians are divided on Becket's role. To many he was a worldly opportunist who, somewhere along the way, underwent a remarkable spiritual conversion. Others saw him as a martyr only to ambition, who lost out in a struggle for power with his King, Britain's Alfred Duggan, a first-rate historical novelist (The Little Emperors), takes a polite

BECKET'S MURDER Why did he ask for it?

middle ground. He does not really care for the business of martyrdom either, and accepts King Henry II's description of Becket as "a very good actor [who] played his part so carefully that he became the character he was imitating.

Two Young Men. Duggan brilliantly sets the scene: the turmoil of 12th century England, in which Norman rule was still insecure. Since the conquerors felt they must stick together, it was possible for an ambitious young Norman lad. though only the son of a Cheapside burgess, to get a helping hand from Norman nobles. Young Thomas managed to acquire both a knight's training and a lawyer's education, a combination which, while he was still in his 30s, had drawn him to the attention of England's brand-new young Norman King, Henry II. Red-haired, redtempered Harry made Becket his Chancellor. Towering Thomas à Becket impressed the King with his courage (he would ride to war at the head of his own troop of

IT TOOK A HAMMERMILL INVENTION AND \$500,000 -but now your Hammermill Bond is cleaner than ever

Now YOU CAN sign your letters on Hammermill Bond with added pride.

Hammermill Bond has always been scrubbed cleaner than a small boy going to a party. On its half-mile trip through our plant the pulp is washed and screened and bleached and washed again. That's why in the past you've found so few specks to mar its brilliant blue-whiteness.

Now a Hammermill invention makes Hammermill Bond even cleaner than before. The equipment, shown above, gives our blended fibers one last "bath" just before they go on the papermaking machines.

The pulp fibers are pumped, whirling, into those cone-shaped pipes. The dire particles, being heavier, are flung to the outside and carried away so they can never get into the paper. That white froth you see is actually "dirty" pulp. The clean fibers rise to the top, are piped immediately to the papermaking machine. There they become paper for the cleanest looking letters you ever signed

This invention took Hammermill four years to develop, half a million dollars to install; a huge investment just to make your Hammermill Bond "cleaner than line of technological advances that make Hammermill Bond 1) print better -ask your printer, 2) type better-ask your secretary, 3) look better-see for vourself! Printers everywhere use Hammermill papers. Many display this shield. Hammermill Paper Company, Erie, Pa.

Yet it's merely the newest in a long

knights) and skillfully helped Henry rule his vast realm. But to keep the King's peace. Becket had to keep peace with the King. Monarch and merchant's son became friends. Hawking in the marshes of Essex or carousing in the taverns of Cheapside, they were seldom apart.

Becket lived high, but only. Biographer Duggan ministains, to uphold his position. He sipped water flavored with lime blossoms while his guests downed Gascon wine. When Henry picked Becket to be Archbishop of Canterbury—largely to get control of the church and church funds— Thomas accepted reluctantly. "The love you now feel for me," he said prophetically, "will turn to bitter hate."

ically, "will turn to bitter hate Murder in the Cathedral. And now began Becket's great transformation. He exchanged the scarlet of state for a monk's hair shirt. If he was merely playing a part, he utterly convinced his audience and, in the end, himself. He proudly recalled that the Archbishops of Canterbury had traditionally been protectors of the poor and oppressed, that St. Augustine had been the first to occupy the ancient see. Step by step. Becket fought the King's encroachments on church power; finally, in danger of his life, he fled to France in a rowboat. After six years he returned to Canterbury, still defiant. The King was heard to scream: "What sluggards, what cowards have I reared in my courts? Not one will deliver me from this turbulent priest!

Soon after, on Dec. 29, 1170 four knights with a band of brigands approached Canterbury Cathedral, When the prior tried to bar the doors, the archbishop said: "The House of God should not be made a castle. I command you under holy obedience, to open those doors!" In cold detail. Author Duggan describes how Becket, the trained warrior, with his dying breath: "For the Holy Name of Jesus and the safety of His Church, I offer myself to death.

Duggan is a master at painting the background of this drama-the clothes, the customs, the pageantry. He reconstructs the dialogue of his characters and reads their thoughts. But somehow he never seems to read their souls. Why did Becket choose martyrdom? In Duggan's view, Becket was goaded to death by a kind of perverse romanticism; as a Norman knight ringed by his enemies, he died to show the English that it was "the Norman custom to stand fast." This mutedly rationalist ending of an otherwise excellent book will fail to satisfy many readers. It shows, once again, what a superh and poetically accurate work is T.S. Eliot's Murder in the Cathedral, with its far nobler picture of a man who had put aside ambition-even spiritual ambition-and found a faith so strong that he could joyfully accept death as its price:

I have had a tremor of bliss, a wink of heaven, a whisper, And I would no longer be denied; all

things
Proceed to a joyful consummation.

Ever see your banker drive a tractor?

Is you watched the man you see here as he carefully put this tractor through its paces—if you saw the professional eye he had for its performance—you might take him for a farm equipment manufacturer. But he's actually a lending officer from The First National Bank of Chicaco!

He's from Division C—the Division of our Commercial Banking Department that specializes in serving the firms that build agricultural implements and construction equipment. His boyhood love for farm machinery has developed into a thorough, up-to-date knowledge of heavy equipment during his 35 years at The First.

This kind of interest and knowledge produces a mutually profitable and much easier business relationship with our customers. That's why each of our 10 Divisions serves a certain group of industries exclusively. That's why the officers of each Division are "industry specialized" bankers who get out on the job and keep up with developments in their fields as few other bankers down

One of these divisions specializes in your business. Its officers know suppliers and trends and markets as they pertain to you.

Why not look into the benefits of our Divisional Organization? It's the most complete setup of its kind in American banking. Get in touch with a man from The First National Bank of Chicago today—a banker who speaks your business language.

Why don't we just <u>call</u> Uncle Charlie?

Yes, indeed, why not call him by Long Distance?

There's nothing like the warmth of your voice to tell him how you are, what you've been doing, what your plans are. You'll enjoy hearing his voice, too—and what he has to say.

Not only that, but every member of the family can talk to him. It's almost as if you were face to face.

Maybe you don't have an Uncle Charlie. But there's someone, somewhere, who'd like to hear your voice. Why not call right now? It's easy. It's quick. And the cost is small.

LONG DISTANCE RATES ARE Low Here are some examples: Cleveland to Pitthburgh 45¢ 35° 45¢ Birminghom to St. Louis 85¢ Chicago to Buffalo 95 6 Milwaukee to New York \$1.20 S2.00 S2.00 S0 Fonction to buffalon, D.C. \$2.00 New York \$2.00

Call by Number. It's Twice as Fast.

MISCELLANY

Bottle Cry. In Washington, D.C., James Sullivan was acquitted on an assault charge after testifying that Loren Meredith Jr. drove by his house, spotted him wearing Bermuda shorts, shouted: "Hey there, who's the sissy wearing his mother's nanties!"

The Rivols. In Akron, Mrs. Evelyn L. Lower testified in divorce court that her husband thought more of his dogs than he did of her, claimed that he slept with three of the beasts at the foot of his bed, complained: "When I asked him to buy groceries, he brought home a bag of dog food instead."

Take. In Stevensville, Ont., police searched for the safecrackers who got away with 5¢ after they blasted a Canadian National Railway safe with such force that they blew the estimated §36 it contained all over the station floor, caused \$2,000 damage to the office.

Years of Decision. In Los Angeles, Mrs. Emma Niccum, 82, got a divorce from husband Elwood, who deserted her three months after their wedding in 1914.

Basic Equipment. In Worthington, Ohio, after he sideswiped a truck, cracked into four trees, knocked down a telephone guy wire, tore off a length of fence and crunched to a stop against the concrete steps of a house, Vincent E. Greene, 22, explained: "My horn got stuck."

Be Prepored. At Camp Drake, near Santa Barbara, Calif., energetic Boy Scouts hastily removed the furnishings from their fire-threatened buildings, were professionally piqued when the fire bypassed the buildings, burned to a crisp all the bedding they had dragged to the middle of the parade ground.

Reflections in ce Private Eye. In Milwaukee, after getting into a saloon argument with another customer. Paul Mumford, 24, flashed a tin badge, shouted that he was about to call the patrol wagon, pulled a fire alarm instead, was fined \$108. when ten fire trucks rushed to the scene.

Spectacular Sport. In Buffalo, when police flushed Decker Smith, 63, from his perch in a tree above the local lovers' lane early one evening and found a pair of binoculars in his pocket, he protested that he was merely making a routine check of nearby horseshoe-game scoreboards.

High on the Hog. In Atlanta, Edward Scott Holler, 47, released from a two-year term at Atlanta Federal Penitentiary, was back in jail five days later because he swiped ten pigs from the prison's farm, hired seven boys, four trucks and a Cadillent of the holl of the holl

"National Accounting Machines save us \$75,000 a year... return 100% of investment annually."

-SUN OIL COMPANY, "Pioneering in petroleum progress for 70 years"

"National Accounting Machines save us \$75,000 a year. Considering our total investment of \$75,050, we enjoy an annual return in savings of 100%.

"Our accounting is highly centralized. For example, while our operations cover both the United States and Canada, the control of our payroll is centered in Philadelphia. This one office organizes all the varying, widespread payroll information.

"We particularly like the original-print earnings record which provides analyzed detail for each of our 17,000 employees. Also important to us is the fact that it requires no 'middle-man' accounting for various deductions, statements for tax reports, savings bond detail and control, stock purchase records and insurance controls.

"Personnel taken from our own ranks is easily trained to produce prompt, accurate accounting records which permit us to maintain an efficient operation at all times."

an efficient operation at all times."

South P. Jones Countreller

In your business, too, National machines will pay for themselves with the money they save, then continue savings as annual profit. Your nearby National man will gladly show how much you can save—and why your operators will be happier. (See yellow pages of your phone book, or write to National, Dayton 9, Ohio.)

THE NATIONAL CASH REGISTER COMPANY, DAYTON 9, OHIO

<u>TASTE</u> its extra-bright tang—so bracing, so distinctive, the liveliest sparkle of them all.

FEEL its extra-bright energy, a fresh little lift that comes through in seconds.

ENJOY its extra-bright quality—the unmatched goodness that tells you "there's nothing like a Coke."

For perfect refreshment, it's always — ice-cold Coca-Cola, so pure and wholesome.
